PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, developed, and deployed scalable **Java Spring Boot** microservices and **REST APIs** for enterprise SaaS platforms, delivering **12+ feature releases** across production environments supporting **95,000+ customers** with **99.9% uptime SLA**.
- Led end-to-end technical workstreams from ideation through production deployment using **Agile ceremonies** and **CI/CD pipelines (Jenkins, Git)**, reducing release cycle time by **35%** and enabling **cross-functional collaboration** with Product, QA, DevOps, and Engineering teams.
- Wrote clean, maintainable, production-ready code in **Python, Java, and SQL** across multiple databases (**PostgreSQL, MySQL, Oracle**), participated in rigorous **code reviews**, and established testing and deployment standards that decreased production incidents by **40%**.
- Managed application reliability and incident response using **Splunk, CloudWatch, and Dynatrace** for real-time monitoring and alerting, achieving **P1/P2 SLA compliance** and reducing mean-time-to-resolution (MTTR) by **28%** through proactive operational dashboard design.
- Architected and maintained enterprise system integrations via **REST APIs** and database-level data flows, supporting **change-control management** and **UAT coordination** across interconnected SaaS and ERP platforms with **zero production data loss**.
- Mentored junior developers and internship cohorts on software development best practices, **Linux administration, shell scripting, and containerisation (Docker)**, enabling knowledge transfer and accelerating onboarding for **8+ team members** across technical pathways.

SKILLS

Languages & Frameworks – Java, Spring Boot, Python, SQL, REST APIs, JavaScript, React, Angular, Flask, FastAPI.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD pipelines, Linux, shell scripting.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, data modelling, ETL, data warehousing, Hadoop, Spark.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, operational dashboards, incident management, SLA management.

Business Intelligence & Analytics – Power BI, Tableau, DAX, Power Query, data visualisation, statistical analysis, scikit-learn, pandas, NumPy, R.

Agile & Collaboration – Agile ceremonies, Scrum, Jira, Confluence, code reviews, cross-functional teamwork, change-control management.

Domain Expertise – SaaS architecture, payments platforms, digital transformation, enterprise systems integration, production support, reliability engineering.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Scalable Multi-Tenant SaaS Feature Platform (HCL Technologies)

- Led design and full-stack development of a **modular feature delivery platform** using **Java Spring Boot microservices, PostgreSQL, and REST APIs**, enabling **12+ concurrent product teams** to ship independent features to **95,000+ customers** without release bottlenecks.
- Implemented **CI/CD automation (Jenkins, Git branching strategies)** and **Docker containerisation** to standardise deployment workflows across teams, reducing release cycle time from **2 weeks to 3 days** and increasing deployment frequency by **480%**.
- Architected **real-time monitoring dashboards (Splunk, CloudWatch, Dynatrace)** with automated alerting and **SLA-driven incident response workflows**, achieving **99.9% uptime** and reducing mean-time-to-resolution by **28%** across **8 production services**.
- Designed **scalable database schema (PostgreSQL)** with optimised indexing and **cross-system integration via REST APIs**, supporting **10M+ monthly transactions** with **sub-100ms API latency** and **zero data loss** in production.
- Mentored **5 junior engineers** on code quality, testing best practices, and **Agile ceremony participation**, resulting in **40% reduction in production incidents** and accelerated onboarding into structured technical pathways.

Operational Intelligence Dashboard for Payment Systems (HCL Technologies)

- Developed enterprise-grade **operational reporting dashboards (Power BI, Tableau)** for real-time visibility into payment transaction flows, system health, and SLA compliance across **SWIFT MT/MX messaging infrastructure** and **ISO 20022 payment processing**.
- Designed **ETL pipelines (Python, SQL)** to aggregate and transform payment operations data from **PostgreSQL and Oracle databases**, enabling **sub-minute refresh cycles** for **40+ business stakeholder reports** and reducing manual reporting overhead by **60%**.
- Implemented **DAX measures and Power Query transformations** for regulatory compliance reporting aligned to **GDPR, PSD2, and SEPA** requirements, automating audit-trail generation and reducing compliance-verification time by **75%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
