PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Conducted deep-dive process mapping and gap analysis across enterprise banking operations, comparing current procedure documents against ISO 20022 message flows and SEPA payment standards to identify **18 critical control gaps** and documented findings in detailed working papers for Controls and Operations management escalation.
- Implemented business operations control frameworks and risk assessments for SWIFT messaging and payments-operations dashboards, collaborating with cross-functional teams including banking domain subject-matter experts and regulatory compliance partners to strengthen internal controls and ensure adherence to financial-services industry standards including **GDPR compliance**.
- Performed change-management and compliance assessment activities across interconnected enterprise business systems (ERP modules, REST API integrations, PostgreSQL/Oracle databases), ensuring process improvements aligned with organizational standards and supporting **12+ UAT cycles** with zero post-implementation control failures.
- Developed operational dashboards and automated control monitoring reports using **Power BI** and **Python scripting**, consolidating control-assessment data across multiple business units and enabling management to track control effectiveness metrics with **99.2% SLA adherence** in production environments.
- Assessed and challenged risk and control methodologies within Target Operating Models for alternative asset servicing operations, identifying process-automation opportunities in fund administration workflows and collaborating with 1st and 2nd line controls functions to align monitoring activities and improve control efficiency by **22%**.
- Consulted on incorporation of control requirements into systems and service improvements, leveraging expertise in business operations and procedure documentation to embed compliance controls into new products and operational initiatives, supporting the organization's broader control frameworks and regulatory obligations.

SKILLS

Business Operations & Controls – process mapping, gap analysis, control frameworks, risk assessment, Target Operating Models, compliance assessment, change management, business process documentation.

Financial Services Domain – fund administration, asset servicing, payments operations, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2 Open Banking, GDPR compliance, regulatory controls.

Enterprise Systems & Integration – ERP systems, REST API integrations, cross-system data flows, change-control management, business system support, interconnected systems, database-level integrations.

Data & Business Intelligence – Power BI dashboards, data modelling, DAX measures, Python automation, SQL (PostgreSQL, MySQL, Oracle), operational reporting, control-monitoring dashboards.

Operational Excellence & Collaboration – cross-functional team leadership, subject-matter expert consultation, UAT coordination, working-paper documentation, executive-level communication, 1st and 2nd line controls alignment.

Technology & Platforms – Python, Java Spring Boot, AWS (EC2, S3, Lambda), Docker, Linux, Git, Jenkins CI/CD, Jira, Confluence, Splunk, Dynatrace.

Certifications & Education – MSc Data Analytics (National College of Ireland), BE Computer Science (SNS College of Technology), IELTS Academic Band 7/9, Full Stack Java Spring Boot & Angular.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Business Operations Control Framework & Gap Remediation Platform (HCL Technologies)

- Architected and led a **12-month control framework implementation** across a MUFG-partnered banking client's fund administration and payments-operations divisions, mapping **47 core business processes** and conducting gap analysis to compare current procedures against ISO 20022 and SEPA regulatory standards, identifying **31 control gaps** with severity classification.
- Developed an automated control-monitoring and remediation dashboard using **Power BI** and **Python ETL pipelines**, consolidating control-assessment data from ERP systems, REST API integrations, and operational databases (PostgreSQL/Oracle), enabling real-time visibility into control effectiveness and reducing manual assessment cycles by **67%**.
- Collaborated with cross-functional teams (Operations, Compliance, Risk, IT) to design and execute **8 process-improvement recommendations**, supporting implementation across interconnected enterprise systems and conducting post-go-live control validation, achieving **100% compliance** with organizational control standards and **99.8% SLA adherence**.
- Performed risk and control assessments across Target Operating Models for alternative asset servicing workflows, challenging existing control designs and identifying **13 opportunities for operational automation** in fund administration and payment-processing procedures, resulting in **22% improvement** in control efficiency and **15% cost reduction**.
- Documented all working papers in comprehensive control-assessment reports with executive summaries for management escalation, establishing a reusable control-documentation framework adopted across the organization's 1st and 2nd line controls functions and supporting **3+ subsequent regulatory audits** with zero findings.

SWIFT Payments Operations & Regulatory Compliance Control Enhancement (HCL Technologies)

- Conducted deep-dive operational analysis of SWIFT messaging dashboard supporting **\$2.3B+ monthly payment volumes**, performing gap analysis between current MT/MX message processing flows and ISO 20022 migration roadmap, documenting **9 critical control gaps** in transaction-flow visibility and payment-reconciliation procedures.
- Implemented enhanced control procedures and operational monitoring aligned with GDPR, PSD2, and SEPA regulatory frameworks, collaborating with banking-domain business analysts and compliance teams to assess control effectiveness and ensure audit-trail completeness across cross-border and instant payment workflows.
- Supported **2 major regulatory change initiatives** (ISO 20022 migration and Open Banking compliance), performing impact assessments on existing control frameworks and recommending process improvements to embed new compliance requirements into payment-operations procedures with zero post-implementation control failures.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
