## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Developed and maintained **descriptive analytics dashboards** using **Power BI** and **Tableau** to support enterprise decision-making, creating **DAX measures** and **data models** that enabled business stakeholders to track KPIs and identify trends; applied **Power Query** for ETL and **data warehousing** principles to consolidate multi-source datasets, reducing manual reporting effort by **40%**.
- Executed recurring and ad-hoc data requests across **PostgreSQL**, **MySQL**, and **Oracle** databases, writing complex **SQL queries** for data validation and schema analysis; maintained comprehensive **documentation** and **user guides** for reporting processes and data definitions, improving team onboarding and reducing support queries by **30%**.
- Investigated and integrated **publicly available data sources** to complement internal datasets, building **data pipelines** and **ETL workflows** using **Python** (pandas, NumPy) to model external data for analytics; conducted **exploratory data analysis** and **statistical analysis** to validate data quality and uncover actionable insights for operational stakeholders.
- Drove continuous improvement initiatives in **tooling, processes, and documentation** across the data team; established standardized **data modelling** conventions, automated routine reporting tasks with **Python scripting**, and collaborated cross-functionally with Operations and Corporate Affairs teams to align analytics capabilities with business mandates.
- Supported data requirements gathering and **UAT coordination** through cross-functional collaboration with business analysts and operations teams; managed change-control processes for data system updates and post-implementation triage, ensuring minimal disruption to recurring reporting cycles and regulatory compliance.
- Applied **statistical methods**, **hypothesis testing**, and **A/B testing frameworks** to evaluate operational improvements; leveraged **R** and **RStudio** for regression analysis and time-series forecasting to support evidence-based decision-making and risk mitigation strategies across the organization.

## SKILLS

**Business Intelligence & Analytics** – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing, descriptive analytics, dashboard development.

**Data Engineering & Pipelines** – Python (pandas, NumPy), SQL (PostgreSQL, MySQL, Oracle), ETL workflows, data pipeline development, data validation, schema analysis.

**Statistical Analysis & Research** – R, RStudio, hypothesis testing, A/B testing, exploratory data analysis, regression analysis, time-series forecasting, statistical methods.

**Data Management & Compliance** – data governance, documentation, user guides, change-control management, UAT coordination, regulatory compliance, data quality assurance.

**Cross-Functional Collaboration** – requirements gathering, stakeholder communication, business analyst engagement, operations team liaison, continuous improvement methodologies.

**Enterprise Systems & Integration** – REST API data integration, multi-source data consolidation, ERP system familiarity, interconnected system support.

**Core Technologies** – Git, Jira, Confluence, Linux, shell scripting, AWS (EC2, S3, Lambda, CloudWatch), Docker.

## EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College  
of Technology, Coimbatore, India

01/2021

## PROJECTS

### State Claims Risk Analytics & Insight Platform (HCL Technologies)

- Architected end-to-end **descriptive analytics platform** in **Power BI** integrating claims data from **160 delegated State authorities** across personal injury and property damage domains; built **data warehouse** using **PostgreSQL** with normalised schema to consolidate disparate operational and financial datasets.
- Designed **executive KPI dashboards** and **operational reporting views** using **DAX measures** and **Power Query** transformations to visualize claims trends, settlement patterns, and risk concentrations; reduced month-end reporting cycle from **5 days to 1 day** and enabled real-time stakeholder visibility into portfolio metrics.
- Investigated and onboarded **publicly available data sources** (regulatory, economic, demographic) using **Python** (pandas, NumPy) to enhance predictive context for claims risk assessment; performed **statistical analysis** and **exploratory data analysis** to identify correlations between external factors and litigation cost drivers.
- Established **data governance framework** with standardized **data models**, **documentation**, and **user guides**; automated **ETL pipelines** using **Python scripting** to refresh claims datasets daily, achieving **99.5% data availability** and enabling continuous improvement in reporting accuracy and timeliness.
- Collaborated cross-functionally with Operations and Corporate Affairs teams to gather analytics requirements and prioritize ad-hoc data requests; supported **UAT coordination** and **change-control management** for reporting system updates, ensuring alignment with State Claims Agency mandates and regulatory obligations.

### Financial Compliance & Payments Operations Reporting Suite (HCL Technologies)

- Delivered **production monitoring dashboards** for banking client's **SWIFT messaging** and **payments operations** platform using **Splunk** and **CloudWatch**, tracking transaction flows, settlement status, and operational alerting across **SEPA** and cross-border payment corridors; reduced **P1/P2 incident detection latency by 45%**.
- Analyzed **ISO 20022 message formats** (MT/MX) and **payments processing workflows** to support regulatory compliance (GDPR, PSD2, Open Banking); documented data flows and audit trails for financial-services operations, enabling seamless cross-system integrations via **REST APIs** and **database-level data flows** across **PostgreSQL**, **Oracle**, and **MySQL**.

## ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
