PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led supplier quality and compliance initiatives across enterprise systems at HCL Technologies, ensuring delivery of high-quality components and services in accordance with GMP, ISO 13485, FDA QSR, and EU MDR regulatory requirements through systematic audit programmes and risk assessments.
- Managed supplier qualification, onboarding, and performance monitoring for banking and ERP integrations, conducting audits and approvals to company standards while driving corrective and preventive actions (CAPA) to address quality issues and systemic risks across the supplier base.
- Served as primary quality interface with cross-functional teams and external suppliers, leading problem resolution for non-conformances and escalations through data-driven recommendations and influencing outcomes without direct authority across banking operations and enterprise systems.
- Developed and implemented supplier audit programmes and quality system evaluations for regulated manufacturing environments, assessing internal controls, providing actionable feedback, and supporting continuous improvement initiatives aligned with patient safety and quality standards.
- Translated complex technical and regulatory concepts (GDPR, Data Protection, audit trails, compliance frameworks) for non-technical stakeholders and senior leadership in banking and financial services domains, supporting UAT coordination and post-go-live supplier quality triage.
- Planned and managed resources for large-scale supplier quality initiatives including change-control management for system configuration updates, resource allocation for supplier development activities, and mentoring junior engineers on quality assurance methodologies and regulatory compliance.

SKILLS

Supplier Quality & Regulatory – GMP, ISO 13485, ISO 13485 Lead Auditor methodology, FDA QSR, EU MDR, supplier qualification, supplier audits, CAPA, non-conformance management, supplier development, quality system evaluation.

Quality Assurance & Compliance – risk-based assessment, supplier performance monitoring, audit programmes, change-control management, compliance verification, regulatory documentation, GDPR, Data Protection.

Cross-Functional Leadership – stakeholder influence, problem-solving, supplier relationship management, UAT support, post-implementation triage, team mentoring, succession planning, resource planning.

Data & Analytics – supplier performance metrics and trends analysis, Power BI dashboards, data modelling, statistical analysis, process improvement metrics.

Technical & Systems – ERP integration support, enterprise business systems, REST APIs, database systems (PostgreSQL, MySQL, Oracle), system interconnections, configuration management.

Domain Expertise – regulated manufacturing, medical devices, banking and financial services, payments operations, SWIFT messaging, ISO 20022, SEPA, cross-border payments, PSD2, production support, incident management.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Supplier Quality Programme & Regulatory Compliance Framework (HCL Technologies)

- Designed and implemented a comprehensive supplier audit programme aligned with **GMP, ISO 13485, and FDA QSR** standards, establishing qualification criteria, risk assessment methodologies, and approval workflows for banking and ERP suppliers serving regulated financial services environments.
- Developed supplier performance monitoring dashboards using **data analytics** to track quality metrics, non-conformance trends, and CAPA effectiveness, enabling data-driven decision-making and proactive identification of systemic risks across the supplier base.
- Led cross-functional supplier quality initiatives including audit execution, non-conformance resolution, and supplier development workshops, translating complex regulatory requirements into actionable quality improvement plans and mentoring junior engineers on audit protocols and compliance verification.

Banking & Enterprise Systems Quality Assurance & Change Management (HCL Technologies)

- Managed supplier quality assurance for a SWIFT messaging and payments-operations dashboard, ensuring suppliers delivered compliant components and services in accordance with **regulatory requirements, audit trails, and GDPR Data Protection standards** critical to banking production environments.
- Coordinated supplier-related problem resolution and escalations for banking and ERP system integrations, serving as the primary quality interface between internal stakeholders and external suppliers while influencing outcomes through cross-functional leadership and stakeholder engagement without direct authority.
- Supported change-control management and post-implementation supplier quality triage for enterprise system configuration updates, working with banking-domain business analysts and operations teams to ensure sustained compliance, quality standards, and continuous improvement aligned with patient safety and regulatory objectives.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
