PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and maintained **Python** backend features and **REST APIs** using **Spring Boot** and **Flask**, collaborating with product stakeholders to deliver payment-processing microservices; wrote clean, maintainable, well-tested code across **150+ API endpoints** with **99.2% uptime SLA** in production environments.
- Developed **React** and **TypeScript** frontend components for an enterprise certification and assessment dashboard, participating in code reviews and modern software engineering practices; reduced page load time by **40%** through component optimization and state-management refactoring.
- Implemented continuous improvement across the product engineering lifecycle using **Git branching**, **Jenkins CI/CD pipelines**, and **Docker containerisation**; automated deployment workflows resulting in **60% faster release cycles** and improved reliability in greenfield and legacy environments.
- Supported reliability and scalability of regulated-industry applications through **Splunk**, **Dynatrace**, and **CloudWatch** monitoring; managed **P1/P2 incident response** and post-implementation triage for compliance-critical systems (GDPR, audit trails), maintaining **98.5% service availability** across **12+ interconnected systems**.
- Collaborated with experienced engineers and technical leadership to design and deploy **AWS** cloud infrastructure (**EC2, S3, Lambda, CloudWatch**) for scalable assessment platforms; leveraged **AI-assisted development tools** to accelerate feature delivery by **35%** while maintaining code quality standards.
- Engineered data pipelines and ETL workflows using **Python** scripting, **SQL (PostgreSQL, MySQL, Oracle)**, and **Power BI** dashboards to support product analytics and operational reporting; enabled cross-functional teams to make data-driven product decisions with **real-time visibility** into assessment completion rates and learner engagement metrics.

SKILLS

Backend & Full Stack – Python, Flask, FastAPI, Java, Spring Boot, REST APIs, microservices architecture.

Frontend – React, TypeScript, Angular, component development, state management.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, CI/CD pipelines.

Data & Analytics – SQL (PostgreSQL, MySQL, Oracle), data modelling, data warehousing, Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn.

Monitoring & Reliability – Splunk, Dynatrace, application performance monitoring, SLA management, incident response, production support.

Regulated Industries & Compliance – GDPR, audit trails, change-control management, UAT coordination, SWIFT messaging (MT/MX), ISO 20022, SEPA, payments processing.

Methodologies & Tools – Agile/Scrum, code reviews, modern software engineering practices, AI-assisted development, Jira, Confluence.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Certification Assessment Platform – Greenfield Full Stack Development (HCL Technologies)

- Architected and built a **Python/React** full stack assessment and certification platform for regulated industries (aviation, industrial safety, government); delivered **12 core feature releases** over **8 months** spanning backend API design, frontend UI/UX, and cloud infrastructure on **AWS**.
- Designed **Python FastAPI** microservices for assessment delivery, learner progress tracking, and compliance reporting; integrated **PostgreSQL** data models to support **50,000+ concurrent learners** with **99.5% API availability** and **<200ms p95 latency**.
- Developed **React/TypeScript** interface components for exam delivery, real-time result visualization, and certification workflows; leveraged **AI-assisted development tools** to accelerate UI component creation by **45%** while maintaining accessibility standards.
- Implemented **Docker containerisation**, **Jenkins CI/CD pipelines**, and **AWS CloudWatch** monitoring to enable automated testing, continuous deployment, and production reliability; reduced mean time to recovery (MTTR) by **55%** and deployment frequency to **daily releases**.
- Built **Power BI** dashboards and **SQL** data pipelines to provide real-time visibility into assessment performance, learner completion rates, and regulatory compliance metrics; enabled product and compliance teams to identify bottlenecks and optimize certification workflows.

SWIFT Payments Operations Dashboard & ISO 20022 Migration (HCL Technologies)

- Engineered production-support infrastructure for a **SWIFT messaging** payments-operations dashboard supporting **€2.5B+ daily transaction volume**; implemented **Splunk** and **Dynatrace** monitoring to detect payment-flow anomalies and regulatory compliance violations in real-time.
- Designed **SQL** schema changes and **ETL pipelines** to migrate payment-message formats from **SWIFT MT** to **ISO 20022 MX** standard; coordinated **UAT** with banking operations teams and regulatory stakeholders, ensuring **100% transaction audit trail** and **GDPR/PSD2** compliance across **8 European banking corridors**.
- Developed **Python** reconciliation automation to validate **SEPA instant payments** and cross-border payment flows; reduced operational overhead by **70%** and eliminated manual reconciliation errors through **data validation scripting** and change-control governance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
