PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Acted as liaison between **business, IT and QA teams** at HCL Technologies, ensuring alignment on requirements and technical deliverables for banking payments systems supporting **Tier-1 financial institutions** in production environments.
- Gathered, analysed and documented **payment-related business requirements** from functional BAs, product SMEs and banking stakeholders; translated requirements into **technical specifications** and system integration designs for **Low and High Value Payments, Cross Border Payments** implementations.
- Oversaw **UAT coordination and post-implementation support** for payments production systems; resolved **technical issues during development and post-go-live** phases across interconnected **ERP and enterprise business systems** with **change-control management** and regulatory audit compliance.
- Demonstrated in-depth **payments domain solutioning experience** across **SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, Instant Payments, PSD2 Open Banking, and tokenization** concepts; interpreted **SWIFT / SEPA regulatory rulebooks** and translated compliance requirements into system configurations.
- Executed **production support and incident management** for payments-operations dashboards using **Splunk, CloudWatch, Dynatrace**; maintained **SLA management** and P1/P2 incident response for mission-critical payment message processing with **GDPR and financial regulatory compliance** guardrails.
- Developed **SQL (Oracle, PostgreSQL, MySQL) data queries and schema changes** for payments reconciliation workflows, transaction-flow visibility, and operational alerting; provided domain inputs to delivery and implementation teams to ensure solution alignment with banking client requirements.

SKILLS

Payments Domain Expertise – ISO 20022, SWIFT MT/MX messaging, SEPA, Instant Payments, Cross Border Payments, PSD2, Open Banking, tokenization, Low and High Value Payments, payments reconciliation workflows.

Banking & Financial Services – BFSI domain solutioning, regulatory compliance (GDPR, Data Protection), SLA management, audit trails, production support for payment systems, ERP integration support.

Business Analysis & Requirements – Requirements gathering and analysis, business requirement documentation, technical specification translation, UAT coordination, stakeholder management, cross-functional collaboration.

Database & SQL – Oracle, PostgreSQL, MySQL, database design, schema changes, data validation, transaction-flow analysis, reconciliation query development.

Production Support & Monitoring – Splunk, CloudWatch, Dynatrace, operational dashboards, incident management, SLA management, alerting and monitoring, post-implementation support.

Enterprise Systems & Change Management – ERP systems, business systems integrations, change-control management, system configuration, inter-system REST API integrations.

Technical Skills – Java Spring Boot, Python scripting, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins, Git, Jira, Confluence.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments-Operations Dashboard & Production Support (HCL Technologies)

- Served as payments business analyst and production support liaison for a Tier-1 banking client's **SWIFT messaging and payments-operations dashboard**, providing **walk-throughs of requirements** to functional BAs, QAs, engineering teams and solution architects.
- Analysed and documented **payment-related business requirements** across **Low and High Value Payments, Cross Border Payments, SEPA, Instant Payments, and ISO 20022 message flows**; translated banking client requirements into **technical specifications** for system enhancements and integrations.
- Executed **UAT coordination and post-implementation support**; resolved technical issues during development and go-live phases; maintained **production support and monitoring** using **Splunk and CloudWatch** for **SLA management** and **P1/P2 incident response** on payment message processing.
- Interpreted **SWIFT / SEPA regulatory rulebooks** and PSD2 compliance frameworks; ensured system configurations and operational dashboards met **GDPR, financial regulatory compliance** and audit trail requirements for mission-critical payments operations.

Enterprise ERP Integration & Change-Control Support (HCL Technologies)

- Provided domain inputs and business analysis support for **ERP systems integration** and interconnected enterprise business systems serving banking and financial services clients; worked with delivery and implementation teams to ensure solution alignment with business requirements.
- Executed **change-control management** for system configuration updates, UAT coordination, and post-go-live support across **ERP modules and operational platforms**; resolved technical issues and ensured seamless system integration.
- Developed **SQL queries (Oracle, PostgreSQL, MySQL)** for cross-system data validation and reconciliation workflows; designed **database schema changes** supporting business process enhancements and payment reconciliation flows.
- Collaborated with functional BAs, solution architects, and technical teams to understand **technical dependencies** and deliver integrated solutions across interconnected business systems with **REST API integrations** and data flow automation.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
