PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **CI/CD pipelines** using **Jenkins** and **GitHub Actions** to enable efficient software delivery across enterprise Java/Spring Boot and Python microservices, reducing deployment time by **40%** and improving release frequency.
- Built and optimized **cloud infrastructure** on **AWS** (EC2, S3, Lambda, RDS, IAM, CloudWatch) with **Infrastructure as Code** principles, provisioning scalable, secure, and highly available systems supporting **500+** daily transactions in production.
- Orchestrated and managed **containerised applications** using **Docker** and **Kubernetes**, automating deployment workflows, scaling policies, and resource management to ensure **99.9% uptime** across microservices in regulated banking environments.
- Automated operational processes and infrastructure provisioning using **Python** and **Bash** scripting, including data pipeline orchestration, system monitoring automation, and scheduled reporting that eliminated **15+ hours** of manual operational overhead weekly.
- Performed **incident response** and **on-call rotation** duties for **P1/P2 production incidents**, troubleshooting infrastructure, deployment, and performance issues across **Splunk**, **Dynatrace**, and **CloudWatch** monitoring dashboards with **SLA compliance** requirements.
- Collaborated with Software Engineering and QA teams to contribute to architectural decisions, implementing cloud security best practices (IAM policies, encryption, compliance controls) and continuously improving infrastructure design for reliability and compliance in high-regulation banking systems.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, RDS, Lambda, IAM, CloudWatch), Infrastructure as Code, cloud security best practices, high availability architecture.

Container & Orchestration – Kubernetes, Docker, containerised application management, deployment automation, resource scaling.

Infrastructure as Code – Terraform, configuration management, automated provisioning.

CI/CD & DevOps Tools – Jenkins, GitHub Actions, Git, GitLab CI/CD, code review workflows, Agile/Scrum.

Scripting & Automation – Python, Bash, Linux, shell scripting, cron jobs, operational automation.

Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, incident response, on-call management, SLA management, troubleshooting.

Databases & Data Platforms – PostgreSQL, MySQL, Oracle, SQL, data pipeline architecture, ETL orchestration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Banking Payments Dashboard & Infrastructure (HCL Technologies)

- Designed and operated **production infrastructure** supporting a SWIFT messaging and payments-operations dashboard for a tier-1 banking client, managing **AWS** resources (EC2, RDS, S3, Lambda) and ensuring **24/7 availability** and regulatory compliance.
- Built **CI/CD pipelines** using **Jenkins** to automate deployment of Java Spring Boot microservices and Python data-processing jobs, enabling rapid feature delivery while maintaining audit trails and change-control for **regulated financial systems**.
- Developed **Python** and **Bash** automation scripts for system monitoring, alert orchestration, and operational reporting across **Splunk** and **Dynatrace**, reducing mean-time-to-resolution (MTTR) for **P1/P2 incidents** in payments processing by **35%**.
- Managed **Kubernetes** cluster deployments and **Docker** containerisation for microservices handling ISO 20022 message flows and SEPA/cross-border payment operations, implementing **security best practices** (IAM, encryption, network policies) aligned with banking regulatory requirements.

Ireland Jobs Tracker – AI Workflow Automation & CI/CD Pipeline (Personal Project)

- Architected end-to-end **Infrastructure as Code** and **CI/CD automation** using **GitHub Actions** to orchestrate data ingestion, API integration, and deployment workflows, scaling from **10 to 500+ jobs** processed daily with zero manual intervention.
- Implemented **cloud-based deployment** on **Vercel** with **GitHub Actions** CI/CD pipelines, automating testing, build, and production deployments with full infrastructure automation and monitoring.
- Developed **Python**-based orchestration scripts for API integration (Claude/Anthropic SDK), data transformation pipelines, and artifact generation, demonstrating advanced **automation** and **scripting** proficiency in real-world workflow systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
