PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and maintained **WordPress** websites with custom theme development, **ACF** field implementations, and page builder integrations across **3+ years** of professional web development in enterprise environments, delivering **20+ production sites** end-to-end from scoping through QA and live launch.
- Developed **Shopify** storefronts using **Liquid templating**, theme customisation, and app integrations; managed **WooCommerce** configurations and product catalog migrations for e-commerce clients with daily transaction volumes exceeding **500+ orders**.
- Implemented headless CMS architectures and **component-based frameworks** using **React** and **Angular** for content-driven websites, integrating **REST APIs** for third-party services (CRM, booking systems, analytics platforms) and ensuring seamless client-backend communication.
- Collaborated directly with clients on technical requirements, design handoff accuracy, and scope management; communicated feasibility assessments, blockers, and technical risks early to project teams and stakeholders, reducing scope creep by **30%** across **15+ concurrent projects**.
- Managed ticketed support queues for website updates, bug fixes, and feature requests using **Jira**; maintained **clean, well-documented code** with **Git** version control, code review discipline, and agreed development standards across multi-platform environments.
- Applied **core web performance** optimisations including image compression, lazy loading, caching strategies, and **SEO best practices** (meta tags, structured data, canonical URLs); implemented **email development** templates for marketing automation platforms with responsive design across **Outlook, Gmail, Apple Mail**.

SKILLS

Web Development Platforms – WordPress (custom themes, ACF, page builders), Shopify (Liquid templating, theme customisation, app integration), WooCommerce, headless CMS architectures.

Frontend Technologies – HTML, CSS, JavaScript, React, Angular, Tailwind CSS, responsive design, Figma design implementation.

Backend & APIs – REST APIs, third-party integrations (CRM, booking, analytics), API-driven content delivery, system interconnections.

Development Tools & Practices – Git version control, Jira ticketing, code review discipline, clean code standards, email development, marketing automation platforms.

Performance & Standards – Core web performance optimisation, SEO best practices, responsive design, accessibility standards.

Project Management – Multi-project management, support queue handling, technical scoping, feasibility assessment, client communication, UAT coordination.

Additional Skills – Python, SQL, AWS (EC2, S3, Lambda), Docker, Linux, CI/CD pipelines, data analysis, Power BI dashboards.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise WordPress & Shopify Build Programme (HCL Technologies)

- Architected and delivered **20+ production websites** across WordPress, Shopify, and headless CMS platforms for enterprise clients; managed end-to-end technical ownership from initial scoping and feasibility assessment through design handoff, development, QA, and live launch.
- Implemented custom **WordPress themes** with **ACF field configurations**, page builder integrations, and **WooCommerce** product management; built **Shopify storefronts** with **Liquid templating**, theme customisation, and third-party app integrations for payment processing and inventory management.
- Integrated **REST APIs** for CRM, booking, and analytics platforms; developed **component-based React** and **Angular** frontends for content-driven applications, ensuring accurate implementation of **Figma designs** and maintaining **clean, well-documented code** standards.
- Reduced scope creep by **30%** through early identification and communication of technical blockers, scope changes, and feasibility risks; collaborated directly with clients, designers, and production managers on technical requirements and launch readiness.

Ireland Jobs Tracker – AI-Powered Resume Workflow (Personal Project)

- Engineered full-stack web application with **Claude API** integration using **prompt engineering** and structured-JSON guardrails to generate job-description-tailored resumes at scale; deployed end-to-end workflow on **Vercel** with **GitHub Actions** CI/CD automation.
- Built API-driven data pipeline orchestrating **Apify scrapers** for job description ingestion, **Claude-haiku** AI processing for content generation, and **reportlab** PDF rendering; demonstrated expertise in **REST API orchestration**, third-party service integration, and scalable automation.
- Developed responsive frontend using **React** and **Tailwind CSS**; implemented version control discipline with **Git**, automated deployments via **GitHub Actions**, and performance-optimised static site generation for production reliability.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
