PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built strong, trusted relationships with business stakeholders across banking operations and ERP teams through proactive engagement, facilitating discovery sessions and cross-functional workshops that drove shared understanding and alignment on digital initiatives; coordinated UAT planning, scenario creation, and defect triage with business owners, testers and delivery partners to ensure feasibility and clarity throughout solution lifecycles.
- Shaped and refined well-defined business problems and solution options by producing clear, unambiguous **user stories, requirements and acceptance criteria**; developed high-quality analysis artefacts including **process maps, data flows, wireframes and mockups** for payments-operations dashboards and enterprise system integrations, enabling efficient delivery and measurable business value.
- Analysed quantitative and qualitative data to validate business needs, identify operational trends and strengthen decision-making; leveraged **Power BI dashboards, DAX measures and data modelling** to translate complex transaction flows, SLA metrics and regulatory compliance data into actionable insights for banking domain stakeholders and senior management.
- Supported business cases through benefits identification, dependency analysis and evidence-based recommendations; collaborated with PMO and business owners to maintain a prioritised and transparent backlog, ensuring solution options aligned with technology roadmaps, architecture standards, user experience goals and organisational strategy for digital maturity.
- Enabled successful change adoption by developing training materials, user guidance and change readiness support; coordinated post-implementation validation and continuous improvement activities across interconnected enterprise systems, supporting regulatory compliance requirements including GDPR, audit trails and payments-operations SLA adherence.
- Contributed to the promotion of Hybrid/Agile ways of working and collaborative delivery practices; supported delivery teams operating in DevOps environments through **Jira ticketing, Confluence documentation, CI/CD visibility and change-control management**, ensuring predictable, value-driven delivery outcomes across high-value digital initiatives.

SKILLS

Business Analysis & Requirements – user stories, acceptance criteria, requirements gathering, process mapping, data flow analysis, wireframing, mockups, solution design, backlog management.

Stakeholder Engagement & Communication – workshop facilitation, discovery sessions, cross-functional collaboration, relationship building, UAT coordination, change readiness, training material development, user guidance.

Data Analysis & Reporting – Power BI, DAX, Tableau, data modelling, Power Query, exploratory data analysis, quantitative analysis, qualitative analysis, business intelligence.

Enterprise Systems & Integration – ERP support, business system integration, REST API integration, cross-system data flows, change-control management, system configuration, post-implementation support.

Banking & Payments Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, payments-operations workflows, PSD2, Open Banking, regulatory compliance, GDPR, audit trails, SLA management.

Agile & DevOps Delivery – Hybrid Agile methodology, DevOps practices, Jira, Confluence, CI/CD pipelines, Git, Jenkins, incident management, production support monitoring.

Technical Foundation – Python, SQL, PostgreSQL, MySQL, Oracle, Java, Spring Boot, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Splunk, Dynatrace.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Payments-Operations Dashboard & SWIFT Messaging Platform (HCL Technologies)

- Delivered end-to-end business analysis and requirements management for a **SWIFT messaging / payments-operations dashboard** supporting a major banking client, translating complex payment flows and regulatory needs into clear, unambiguous user stories and acceptance criteria for development teams.
- Shaped solution design by analysing **ISO 20022 message flows, SEPA payments processing and cross-border payment workflows**; produced detailed process maps, data flow diagrams and wireframes that ensured alignment with payments operations teams, compliance stakeholders and technology architecture standards.
- Collaborated with banking-domain BAs, operations teams and regulatory specialists to validate business requirements around **SLA management, audit trails, GDPR compliance and transaction-flow visibility**; coordinated UAT planning, scenario creation and post-implementation defect triage, ensuring delivered solutions met operational and regulatory standards.
- Supported post-implementation success through training material development, user guidance for operations staff and change-readiness workshops; validated delivered solution performance through operational metrics dashboards built with **Power BI and data modelling** to track transaction volumes, SLA compliance and payment message auditing.

Enterprise ERP & Business Systems Integration Programme (HCL Technologies)

- Delivered business analysis and change management support across a multi-phase **enterprise ERP and interconnected business systems integration** programme, facilitating discovery sessions with banking client stakeholders to understand system dependencies, configuration requirements and operational workflows.
- Produced high-quality analysis artefacts including **system integration process maps, cross-system data flow diagrams and requirements specifications** for **REST API integrations** and **database-level data flows** across PostgreSQL, Oracle and MySQL environments, ensuring feasibility and alignment with delivery teams.
- Managed change-control and post-go-live support by collaborating with PMO, business owners and technical teams to prioritise the backlog, triage integration issues and validate that solution options aligned with technology roadmaps and business continuity goals; coordinated UAT coordination and scenario creation to reduce implementation risk.
- Enabled successful adoption through comprehensive **training materials and user guidance** for business-system users across operations teams; supported continuous improvement through post-implementation data analysis to identify process optimisations and quantify benefits realisation across interconnected ERP modules.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
