PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected and implemented **complex React and TypeScript UI components** for enterprise workflow management dashboards, delivering **12+ reusable component library modules** used across multiple client applications with **Redux state management** and REST API integration.
- Led **test-driven development practices** for UI implementations using **Jest and React Testing Library**, achieving **89% code coverage** and reducing production UI bugs by **34%** through comprehensive unit and integration testing.
- Designed and mentored **3 junior engineers** on modern **TypeScript/React development patterns**, best-practice component architecture, and **React-based UI design system** implementation; conducted **40+ code reviews** enforcing idiomatic JavaScript and TypeScript standards.
- Developed **GraphQL and REST API client layers** in **TypeScript** for complex workflow applications, implementing optimized data fetching, caching strategies, and error handling that reduced API call overhead by **28%**.
- Containerized multi-tier **React/Node.js applications using Docker** and orchestrated CI/CD pipelines via **Jenkins and GitHub Actions**, enabling **5-day faster deployment cycles** and **99.2% production uptime** for workflow tools.
- Collaborated with technical team leads to design overall **UI architecture** for large-scale legislative workflow components; integrated **PostgreSQL and MySQL** data models with frontend forms and dashboards, ensuring data consistency across interconnected systems.

SKILLS

Frontend & UI Development – JavaScript, TypeScript, React, Redux, React Hooks, component composition, UI design systems.

State Management & Data Layer – Redux, Redux Thunk, GraphQL clients, REST API integration, data fetching patterns, caching strategies.

Testing & Code Quality – Jest, React Testing Library, test-driven development, unit testing, integration testing, code review practices.

Backend & Database Integration – REST APIs, GraphQL, RPC, PostgreSQL, MySQL, data modeling, schema design, SQL.

DevOps & Containerization – Docker, Docker Compose, Jenkins pipelines, GitHub Actions CI/CD, Git branching, application deployment.

Professional Practices – Agile/Scrum, Jira, mentoring, technical documentation, cross-functional collaboration, MVC frameworks.

Data & Analytics – Python, pandas, NumPy, scikit-learn, Power BI, data visualization, SQL data warehousing, ETL.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Legislative Workflow Management UI (HCL Technologies)

- Built **15+ complex React components** for legislative workflow dashboards using **TypeScript, React, and Redux**, managing state for multi-step form workflows, real-time document versioning, and regulatory compliance tracking.
- Implemented **REST API client layer** in **TypeScript** to consume backend microservices, integrating PostgreSQL-backed data models with React forms and reducing frontend data-fetching latency by **31%**.
- Designed and deployed **reusable React UI design system components** (buttons, modals, tables, date-pickers) following industry best practices; documented component APIs and usage patterns, enabling **40% faster feature development** across team.
- Applied **test-driven development methodology** with **Jest and React Testing Library**, writing **200+ test cases** covering component logic, Redux reducers, and API mocking; achieved **87% code coverage** and eliminated **18 regression bugs** in UAT.

Ireland Jobs Tracker – AI-Powered Resume Generation Platform (Personal Project)

- Engineered end-to-end **TypeScript/React** frontend for job-description parsing and resume customization, featuring **Redux** for state management and **REST API integration** to backend Claude API orchestration layer.
- Architected **prompt engineering pipeline** using **Anthropic Claude API (claude-haiku-4-5)** to generate job-description-tailored resumes at scale; implemented **structured JSON schema validation** and constraint guardrails to ensure output quality and consistency.
- Containerized full-stack application using **Docker** and automated deployment via **GitHub Actions CI/CD** to **Vercel**, enabling automated resume generation at **100+ job postings per week** with **zero manual intervention**.
- Integrated **Apify web-scraping APIs** for JD ingestion, orchestrated multi-stage workflow automation (scrape → ingest → generate → render → deploy), and built **reportlab PDF generation** backend; delivered **production-grade AI workflow system** handling **500+ concurrent requests** with **99.1% uptime**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
