PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **CI/CD pipelines** using **Jenkins** and **Git**, automating build, test, and deployment workflows across enterprise Java and Python microservices; reduced deployment time by **40%** and improved release frequency to multiple deployments per week.
- Wrote **Python** and **Bash** scripts for infrastructure automation, operational task orchestration, and routine DevOps workflows; automated **20+** manual processes including log analysis, server health checks, and scheduled reporting across production environments.
- Managed cloud infrastructure on **AWS** (EC2, S3, Lambda, CloudWatch) and containerized applications using **Docker**; gained hands-on experience with container orchestration concepts, networking, and resource management across multi-environment deployments.
- Operated and monitored production systems using **Splunk**, **Dynatrace**, and **CloudWatch**; implemented observability workflows for metrics collection, alerting, and incident triage; participated in **P1/P2 incident response** and on-call rotation with SLA-critical production support.
- Collaborated cross-functionally with product engineering, QA, and operations teams on **Infrastructure-as-Code** concepts and change-control management; coordinated UAT, post-go-live infrastructure validation, and post-incident reviews across interconnected enterprise systems.
- Built end-to-end automation workflows orchestrating data pipelines and system integrations using **Python**, **REST APIs**, and **GitHub Actions**; designed **Infrastructure-as-Code** principles into project deployment strategies and documented runbooks and operational procedures for team knowledge sharing.

SKILLS

DevOps & CI/CD – Jenkins, Git, GitHub Actions, CI/CD pipeline design, release process automation, deployment orchestration.

Cloud Platforms & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, Infrastructure-as-Code concepts, cloud resource management, cost monitoring.

Programming & Scripting Languages – Python, Bash, shell scripting, automation scripting, systems programming.

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, metrics collection, alerting, logging, incident triage, SLA management.

Linux & Systems Administration – Linux systems, log analysis, cron jobs, shell scripting, networking fundamentals, TCP/IP, DNS, firewalls.

Incident Management & Production Support – on-call rotation, P1/P2 incident response, production support, post-incident review, first-principles troubleshooting.

Enterprise Integration & Collaboration – REST API integration, cross-functional communication, change-control management, Jira, Confluence, Agile/Scrum, runbook documentation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Payments Operations Dashboard & Monitoring Infrastructure (HCL Technologies)

- Architected production support and **observability** infrastructure for a banking-domain **SWIFT messaging** dashboard supporting **ISO 20022 message flows** and **SEPA instant payments** processing; implemented **Splunk** and **Dynatrace**-based monitoring for transaction-flow visibility and operational alerting across **P1/P2** SLA-critical payment operations.
- Developed **Python** automation scripts for recurring operational tasks including reconciliation workflows, data validation, and payment message auditing; reduced manual operational overhead by **35%** and improved incident response time through automated alerting and triage procedures.
- Collaborated with banking-domain business analysts, operations teams, and regulators on **change-control management**, UAT coordination, and post-implementation infrastructure validation; ensured **GDPR** compliance, regulatory audit trails, and cross-border payment security standards across interconnected ERP and business-system integrations.

Ireland Jobs Tracker – AI-Driven Resume Automation & Deployment Pipeline (Personal Project)

- Engineered end-to-end DevOps automation workflow orchestrating **Apify** data scraping, **Claude API** (Anthropic) integration, **reportlab** PDF generation, and **GitHub Actions** CI/CD pipelines; deployed infrastructure on **Vercel** with Infrastructure-as-Code principles for repeatable, scalable job-description-tailored resume generation at scale.
- Designed **Python**-based automation scripts with structured-JSON prompt engineering, constraint guardrails, and API orchestration; implemented **GitHub Actions** workflows for automated build, test, and deployment; reduced manual resume generation time from hours to minutes per candidate.
- Applied DevOps best practices including declarative Infrastructure-as-Code patterns, automated testing, continuous deployment, and system observability; documented runbooks and operational procedures for project deployment and maintenance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
