PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, developed, and maintained **Power BI dashboards** across multiple business domains using **DAX** and **Power Query** for data transformation and calculation, delivering **15+ interactive reports** that reduced manual reporting time by **40%** and enabled real-time business decision-making for stakeholders.
- Owned and enhanced a **centralised data lake** architecture supporting enterprise reporting, analytics, and management information systems; implemented **data modelling** best practices and **ETL pipelines** using **Python** and **SQL** (PostgreSQL, Oracle, MySQL) to ingest, transform, and validate **10+ data sources**, improving data quality by **35%**.
- Acted as subject-matter expert (SME) on all data-related subjects across the business, providing technical guidance on **data architecture**, **analytics strategy**, and **dashboard design**; conducted training sessions and created comprehensive documentation to enable self-service analytics adoption among **50+ business users**.
- Architected and deployed **data warehousing** solutions supporting cross-functional analytics teams; designed normalized and dimensional schemas, optimized **SQL queries** for performance (**60% query speed improvement**), and established data governance protocols aligned with regulatory compliance requirements.
- Transitioned legacy reporting systems to modern **Power BI** and **Tableau** platforms; migrated **25+ reports** from legacy tools, standardized **data modelling** approaches, and established **CI/CD pipelines** for automated dashboard deployment and version control using **Git** and **Azure DevOps**.
- Collaborated with business analysts, finance teams, and operations stakeholders to gather analytics requirements, validate data accuracy, and deliver **strategic dashboards** for KPI tracking, financial reporting, and operational visibility; supported **UAT** and post-implementation optimization cycles, achieving **98% dashboard adoption** within **6 months**.

SKILLS

Business Intelligence & Analytics – Power BI (dashboards, DAX, Power Query), Tableau, data modelling, data warehousing, ETL, exploratory data analysis.

Data Architecture & Engineering – centralised data lakes, dimensional modelling, schema design, data governance, data quality frameworks, pipeline orchestration.

Programming & Scripting – Python (pandas, NumPy), SQL (PostgreSQL, MySQL, Oracle), R, shell scripting, data transformation.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Azure DevOps, CI/CD pipelines.

Business & Communication – stakeholder management, requirements gathering, cross-functional collaboration, user training, technical documentation, presentation skills.

Domain Knowledge – financial services, payments processing, enterprise business systems, ERP integration, regulatory compliance (GDPR, data protection).

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Centralised Data Lake & Executive Analytics Platform (HCL Technologies)

- Designed and implemented a **centralised data lake** architecture consolidating **12 disparate data sources** (ERP systems, transactional databases, payment platforms) into a unified **dimensional data warehouse** using **PostgreSQL** and **AWS S3**, enabling unified reporting and analytics across the organisation.
- Built **Power BI dashboards** and **Tableau visualisations** serving executive leadership, operational teams, and finance functions; implemented **DAX measures** for complex KPI calculations (revenue recognition, cost allocation, payment reconciliation) and **Power Query ETL workflows** automating daily data ingestion and refresh cycles.
- Established **data modelling standards** and **governance frameworks** including data cataloguing, lineage documentation, and quality validation rules; reduced data inconsistencies by **45%** and achieved **99.5% uptime** for analytics infrastructure through automated monitoring and alerting via **CloudWatch**.
- Migrated **18 legacy reports** from disparate BI tools to a unified **Power BI** environment; standardized **data architecture**, established version-controlled dashboard deployment via **Git** and **Azure DevOps CI/CD pipelines**, and trained **60+ business users** on self-service analytics, reducing analyst workload by **30%**.
- Delivered strategic **analytics and data architecture recommendations** to senior stakeholders; consulted on roadmap prioritization, data infrastructure scaling, and **Fabric integration planning** for next-generation analytics capability, directly supporting **€2M+ cost optimisation initiatives**.

Payments Operations Dashboard & SWIFT Message Analytics (HCL Technologies)

- Designed and maintained a production **monitoring dashboard** for a payments operations platform processing **50,000+ daily transactions**; visualized **SWIFT MT/MX message flows**, payment status timelines, and **ISO 20022** transaction reconciliation metrics using **Splunk** and **Dynatrace**, enabling real-time SLA tracking and incident alerting.
- Built **SQL-based analytics queries** (PostgreSQL, Oracle) to validate **SEPA instant payment processing**, cross-border payment routing, and tokenization workflows; created **data quality reports** identifying **98.7% transaction accuracy** and flagging regulatory audit trails for **GDPR compliance** verification.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
