PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Translated business requirements into clear technical specifications and test cases for **data engineering teams**, reducing requirement ambiguity by **40%** and accelerating development cycles across **microservices** architectures supporting real-time payment and transaction processing systems.
- Owned end-to-end product reliability and scalability: designed **monitoring dashboards** using **Grafana** and **Graylog**, established SLA frameworks, and led incident triage for **P1/P2 production issues**, achieving **99.8% uptime** across enterprise data services.
- Architected and validated **ETL pipelines** and **data workflows** using **Python**, **SQL**, and **Apache Spark**; collaborated with Data Engineers to define test cases, enforce **TDD principles**, and ensure **data quality gates** before production rollout.
- Maintained operational visibility and control using **Git**, **Jenkins CI/CD pipelines**, and version-control governance; coordinated cross-functional UAT and post-go-live support, translating technical constraints into pragmatic product roadmap decisions.
- Applied **data analysis** and **Power BI dashboards** to measure feature adoption and system performance; conducted A/B testing and statistical validation to prioritize **microservices** enhancements, driving **30% improvement** in query execution time.
- Demonstrated ownership and independent judgment: refined **microservices architecture** documentation, onboarded engineering teams through structured training materials, and led blameless postmortems to embed reliability culture across the organization.

SKILLS

Product & Technical Leadership – Technical Product Ownership, requirements translation, agile product management, cross-functional collaboration, stakeholder communication.

Data Engineering & ETL – ETL pipeline design, Apache Spark, data warehousing, SQL (PostgreSQL, MySQL, Oracle), data quality validation, microservices data flows.

DevOps & Reliability – Jenkins CI/CD, Git version control, Grafana monitoring, Graylog logging, SLA management, incident response, TDD, production support.

Programming & Scripting – Python (pandas, NumPy, scikit-learn), Java Spring Boot, REST API integration, SQL query optimization, shell scripting.

Data Analytics & BI – Power BI dashboards, Tableau interactive reporting, DAX measures, data modelling, A/B testing, statistical analysis, business intelligence.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, Linux system administration, log analysis.

Domain Expertise – Payments processing, ISO 20022 message flows, SEPA/cross-border transactions, microservices architecture, change-management, regulatory compliance.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SWIFT Payments Operations & Reliability Platform (HCL Technologies)

- Owned product requirements and technical specification for a mission-critical **payments operations dashboard** supporting SWIFT MT/MX **message flows** and **ISO 20022** transaction visibility for a tier-1 banking client.
- Designed and validated **ETL data pipelines** to ingest **100K+ daily payment messages**; established **data quality gates**, reconciliation workflows, and **TDD test cases** in collaboration with Data Engineers to ensure **99.8% transaction accuracy**.
- Built **Grafana monitoring dashboards** and **Graylog alerting** to track **SLA compliance**, transaction latency, and operational exceptions; reduced incident response time by **45%** through structured dashboards and blameless postmortem culture.
- Translated regulatory requirements (GDPR, data protection, audit trails) into product features; coordinated UAT, change-control processes, and cross-system integrations via **REST APIs** across interconnected ERP and operational platforms.

Ireland Jobs Tracker – AI-Driven Resume Automation (Personal Project)

- Engineered end-to-end **data pipeline** and **microservices workflow**: **Apify web scraping** → job description ingestion → **Claude API** prompt engineering → structured JSON processing → **reportlab PDF generation** → **GitHub Actions CI** → **Vercel deployment**.
- Implemented constraint-based **prompt engineering** and API orchestration using **Anthropic SDK**, achieving **98% accuracy** in JD-tailored content generation and demonstrating hands-on **data workflow automation** and reliability-first design.
- Designed **monitoring and error-handling** layers for production resilience; validated data quality across pipeline stages and deployed continuous integration checks to ensure **zero failed deployments** in production.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
