PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered first- and second-level IT support across end-user desktops, laptops, mobile devices, and peripherals within enterprise environments at HCL Technologies, diagnosing and resolving **hardware configuration**, **Active Directory permissions**, and **Microsoft 365** access issues with **95%+ first-contact resolution rate**.
- Provided production support and monitoring of **SAP Business One (HANA)** instances and **enterprise ERP systems** for banking clients, including user account setup, functional troubleshooting, master data validation, and coordinated testing and rollout of system updates and integrations with cross-functional teams.
- Administered **SUSE Linux Enterprise Server** environments including **monitoring**, **patching**, **access control**, and system reliability tasks; performed **SAP HANA database** operations such as **backups**, **health checks**, and **performance monitoring** to ensure infrastructure stability and compliance.
- Wrote, analysed, and troubleshooted **SQL queries**, **SAP HANA SQL Script** views, and **database housekeeping** procedures to support reporting, data accuracy, and system analysis across **PostgreSQL**, **MySQL**, **Oracle** and **SAP HANA** environments.
- Supported **LAN/WAN networks**, **Wi-Fi**, **VPN access**, **remote connectivity**, and infrastructure components including **firewall and switch administration** under IT Manager direction; monitored **backups**, **endpoint protection**, and **system availability** while enforcing **IT security best practices and compliance requirements**.
- Documented and improved **digital business processes** across sales, warehouse, finance, and operations; mapped **ERP usage flows**, **reporting requirements**, and **system integrations** as part of change-control management and post-go-live support for enterprise business system rollouts.

SKILLS

End-User & Desktop Support – Hardware configuration, troubleshooting, Active Directory, Microsoft 365, user account management, device setup.

ERP & Core Business Systems – SAP Business One (HANA), user provisioning, functional support, system testing, master data maintenance, reporting requirements.

Linux, Database & Infrastructure – SUSE Linux Enterprise Server, SAP HANA database operations, backups, health checks, performance monitoring, SQL script authoring and troubleshooting.

Database & Query Languages – SQL, SAP HANA SQL Script, PostgreSQL, MySQL, Oracle, data validation, reporting views.

Network & Security Infrastructure – LAN/WAN networks, Wi-Fi, VPN access, firewall administration, endpoint protection, system monitoring, IT compliance.

Business Process & Systems Integration – Digital process improvement, ERP integration support, change management, UAT coordination, as-is and to-be process documentation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SAP Business One (HANA) Production Support & System Integration (HCL Technologies)

- Delivered first-line and second-level support for **SAP Business One on HANA** users across banking operations, providing user setup, issue diagnosis, functional assistance, and training on reporting and master data maintenance workflows.
- Assisted with **system updates, enhancements, and integration testing**, coordinating UAT validation and post-rollout triage with cross-functional banking operations teams and external SAP partners to ensure data accuracy and regulatory compliance.
- Wrote and optimized **SQL and SAP HANA SQL Script queries** to support transaction-flow visibility, reporting dashboards, and reconciliation workflows; performed **database health checks, backup verification, and performance monitoring** on SAP HANA instances.

Enterprise Infrastructure & Digital Process Support (HCL Technologies)

- Supported **SUSE Linux Enterprise Server** environments including **monitoring, patch management, access control**, and troubleshooting; administered **firewall, switch, and VPN infrastructure** to maintain **LAN/WAN connectivity, Wi-Fi, and remote access** across office, warehouse, and showroom locations.
- Documented and continuously improved **digital business processes** across sales, finance, warehouse, and operations domains; mapped **ERP usage flows, system integrations, and reporting requirements** to support change-control management, system reliability, and organizational digital transformation.
- Monitored **endpoint protection, backup integrity, and system availability**; enforced **IT security best practices** and coordinated incident response to maintain **IT compliance and operational resilience** across interconnected enterprise systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
