PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **comprehensive test scenarios and test cases** across 15+ financial services delivery projects, translating requirements and design documentation into executable test plans with **98% defect detection accuracy**; coordinated **smoke testing** of multi-tier .NET/IIS/SQL Server environments (Angular portal, API layer, back-end services) prior to test execution phases.
- Executed **API testing** using **Postman** and **REST Assured** frameworks against **.NET RESTful services**; designed **20+ API test suites** covering SWIFT messaging flows, ISO 20022 payment processing, and cross-border payment integrations with **95% pass-rate consistency** across regulated financial services test environments.
- Participated in **defect triage** and **defect management** using **Jira**, raising **300+ production defects** with precise reproduction steps, severity classification, and regulatory impact assessment; retested resolved defects across **Windows Server / IIS** hosted application estates to confirm fixes in pre-production and production environments.
- Supported **regulated financial services environments** with **regulatory compliance testing** and **audit-trail validation** (GDPR, Data Protection, PSD2); verified **ISO 20022 message flows**, **SEPA payment processing**, and **tokenization workflows** across multi-jurisdictional client segments; documented compliance test evidence in **SharePoint** for regulatory and internal audit reviews.
- Leveraged **AI-assisted testing tooling** including **Claude API** for **test case generation** and automated **defect triage**; developed prompt-engineering patterns to scale test scenario creation across payment messaging and ERP integration test suites, reducing manual test case authoring time by **40%**.
- Conducted **environment support** for financial services platforms serving multiple client segments and jurisdictions; performed **smoke testing** across **multi-tier .NET deployments**, validated **SQL Server** database integrity, and coordinated **client test environment availability**; resolved **25+ client queries** related to test data preparation, environment configuration, and UAT readiness.

SKILLS

Test Methodology & Execution – Test scenario design, test case creation, smoke testing, test plan development, defect triage, test execution, UAT coordination, regulatory compliance testing.

API & Integration Testing – Postman, REST Assured, .NET RESTful services, API test automation, SWIFT messaging validation, ISO 20022 message flows, payment processing flows.

Financial Services & Regulatory – Wealth management, investment services, regulated financial services environments, GDPR, Data Protection, PSD2, SEPA, instant payments, cross-border payments, ISO 20022, audit-trail validation, multi-jurisdictional compliance.

Database & Environment Support – SQL Server, PostgreSQL, MySQL, Oracle, SQL query execution, database integrity validation, Windows Server, IIS, .NET application estates, multi-tier deployment testing, environment smoke testing.

Tools & Platforms – Jira, SharePoint, Microsoft Excel with formulae, Postman, REST Assured, .NET, Angular, SQL Server Management Studio, Splunk, CloudWatch.

AI-Assisted Testing & Automation – Claude API, AI-driven test case generation, AI defect triage, prompt engineering for test automation, emerging AI testing tooling.

Languages & Data Skills – Python, SQL, Power BI, data analysis, statistical methods, R, pandas, NumPy.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

SWIFT Messaging & Payments Operations Dashboard Testing (HCL Technologies)

- Designed and executed **comprehensive test scenarios** for a **banking-regulated payments-operations platform** supporting **SWIFT messaging (MT/MX formats)**, **ISO 20022 message flows**, and **cross-border payment processing** across multiple client jurisdictions.
- Performed **API testing** using **Postman** against **.NET RESTful services** for payment message routing, transaction reconciliation workflows, and tokenization features; validated **SEPA instant payment** and **real-time gross settlement (RTGS)** message processing with **zero critical defects** in production.
- Executed **compliance testing** for **GDPR**, **Data Protection**, and **PSD2 regulatory requirements**; documented **audit trails** and **transaction-flow visibility** in **SharePoint** for regulatory review; coordinated **UAT support** with banking-domain business analysts and operations teams to ensure post-implementation readiness.

Multi-Tier .NET / SQL Server Environment Testing & AI-Driven Test Automation (HCL Technologies)

- Performed **smoke testing** across **multi-tier .NET deployments** including **Angular portals**, **API layers**, **back-end services**, and **SQL Server databases**; validated **Windows Server / IIS** application estate health and **environment fit-for-purpose** prior to test execution phases across **15+ regulated financial services projects**.
- Integrated **Claude API** and **AI-assisted testing tooling** to **generate test cases** and automate **defect triage** from natural-language requirements; engineered structured-JSON prompts to scale **test scenario creation** for ERP integrations and payment workflows, reducing manual test authoring by **40%** while maintaining **regulatory compliance** standards.
- Leveraged **Jira** for **defect management**, **SharePoint** for test documentation and team collaboration, and **Microsoft Excel** formulae for test metrics and KPI tracking; coordinated defect resolution across development and infrastructure teams, achieving **95% defect closure rate** within SLA windows in production-support environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
