PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Executed **manual and automated functional, integration, regression, and performance tests** against **Java Spring Boot REST APIs** and enterprise applications in production environments, identifying critical defects and ensuring **99.5% SLA compliance** across P1/P2 incident response cycles at a Fortune 500 financial services client.
- Created comprehensive **automation test scripts** using **Python** and **SQL** (PostgreSQL, MySQL, Oracle) to validate data integrity, ETL pipelines, and batch application workflows; maintained automated test script libraries with **120+ regression tests** executed nightly across interconnected systems.
- Demonstrated **very good knowledge of databases and SQL query language** through ad-hoc testing queries, schema validation, and defect documentation in **Jira**; collaborated with developers and business analysts to interpret automation test results and drive issue resolution in Scrum ceremonies.
- Aligned QA activities with **Software Development Life Cycle practices, Information Security, and Data Governance** policies including GDPR and regulatory compliance; participated in **Agile Scrum methodology** (daily standups, sprint planning, backlog grooming, retrospectives) and change-control management across **UAT coordination** and post-implementation triage.
- Programmed test automation using **modern OOP languages (Java, Python)** against **web applications, APIs, batch applications**, and financial services dashboards; architected **CI/CD integration** with **Jenkins pipelines** to automate test execution and proactively communicated defects with cross-functional engineering teams.
- Identified opportunities for QA methodology improvement and researched automation innovations within a process-driven technology environment; mentored junior team members on proper creation of automated test scripts and participated in testathon activities supporting product releases in a **Scrum team** structure.

SKILLS

QA Automation & Testing – automation test script development, manual functional testing, integration testing, regression testing, performance testing, web application testing, API testing, batch application testing, test automation frameworks, defect documentation, Jira.

Programming & OOP Languages – Java, Python, SQL, C#, object-oriented programming.

Database & SQL – PostgreSQL, MySQL, Oracle, SQL query language, database validation, schema testing, data integrity verification.

Software Development Lifecycle – Agile Scrum methodology, Software Development Life Cycle practices, Information Security compliance, Data Governance, change-control management, UAT coordination, CI/CD integration, Jenkins.

Financial Services Domain – payments operations, SWIFT messaging, ISO 20022, SEPA, cross-border payments, regulatory compliance, GDPR, banking systems.

Cloud & Enterprise Technologies – AWS (EC2, S3, Lambda, CloudWatch), Microsoft Azure, Docker, Linux, Git.

Soft Skills & Agile Practices – Scrum team collaboration, problem-solving, detail orientation, cross-functional communication, mentoring, testathon participation, sprint ceremonies.

EDUCATION AND TRAINING

PROJECTS

Financial Services Test Automation Platform – API & Batch Testing Suite (HCL Technologies)

- Architected and deployed a comprehensive **automation test script library** for **REST APIs, batch applications, and web dashboards** supporting Charles River-style investment operations workflows, covering **functional, integration, regression, and performance test scenarios** across PostgreSQL and Oracle backends.
- Implemented **Python-based automation framework** with **SQL data validation queries** to verify transaction reconciliation and payment message flows; integrated with **Jenkins CI/CD pipelines** to execute **240+ automated regression tests nightly**, reducing manual test execution time by **75%** and enabling **daily regression validation**.
- Programmed **Java and Python OOP test modules** against **multi-system integrations** (ERP modules, payment dashboards, API backends) to detect data inconsistencies and schema changes; documented **500+ defects** with root-cause analysis in **Jira** and collaborated with developers on fix validation.
- Aligned test automation with **Information Security and Data Governance** practices including GDPR compliance checks and regulatory audit trails; participated in **Agile Scrum ceremonies** (daily standups, sprint planning, backlog grooming) and supported **UAT coordination** across 6 cross-functional teams.
- Identified and recommended **QA methodology improvements** including performance test optimization techniques and defect trend analysis; mentored 3 junior QA engineers on test script creation, API testing patterns, and **batch application validation** best practices.

SWIFT Payments Dashboard – Production Monitoring & Data Quality Testing (HCL Technologies)

- Executed **manual and automated functional tests** on a **SWIFT MT/MX messaging dashboard** supporting cross-border payment operations; validated transaction-flow visibility, payment message formats, and ISO 20022 compliance through **SQL-based data validation queries** against PostgreSQL reconciliation tables.
- Created **regression test scripts** to verify SEPA instant payment flows and tokenization workflows; maintained test coverage across **95+ banking-domain test cases** for **P1/P2 incident response** and post-go-live support, achieving **99.5% defect detection accuracy** for production issues.
- Collaborated with banking domain business analysts and operations teams to interpret automation results, document SWIFT message validation defects, and support **Information Security and GDPR compliance** verification in payment processing environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
