PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **Java Spring Boot microservices** on **AWS (EC2, Lambda, S3)** serving **10M+ daily transactions** in a payments-operations platform, implementing **REST API integrations** with cross-border payment systems and achieving **99.9% uptime SLA** through **CloudWatch** and **Dynatrace** monitoring.
- Led **production incident response** and **SLA management** for banking-domain applications, resolving **P1/P2 incidents** within **30 minutes average** via **log analysis**, **distributed tracing**, and **performance troubleshooting** across **PostgreSQL, MySQL, Oracle** databases.
- Architected **Python ETL pipelines** and **data automation workflows** using **pandas, NumPy** for **ISO 20022 message reconciliation** and **SEPA payment processing** validation, reducing manual reconciliation time by **65%** and improving data quality audits.
- Implemented **CI/CD pipelines** in **Jenkins** with **Git branching strategies** and **code review workflows**, accelerating deployment cycles to **5 deployments/week** and ensuring **GDPR compliance** and **regulatory audit trails** across **Docker-containerized** services.
- Developed **Power BI dashboards** and **operational reporting systems** for banking operations teams, visualizing **payment transaction flows**, **SWIFT MT/MX message tracking**, and **system health metrics** for real-time visibility into **cross-border payments** and **PSD2 compliance** status.
- Orchestrated **end-to-end AI workflow automation** leveraging **Claude API** and **prompt engineering** to generate dynamic, **JSON-structured content** at scale; integrated **GitHub Actions CI/CD** with **Vercel deployment** for automated reporting and **API-driven document generation**, demonstrating expertise in **LLM integration** and **automation engineering**.

SKILLS

Backend & Cloud Engineering – Java Spring Boot, Python, REST APIs, AWS (EC2, Lambda, S3, CloudWatch), Docker, Linux, shell scripting.

Data Engineering & Analytics – SQL (PostgreSQL, MySQL, Oracle), ETL pipelines, pandas, NumPy, scikit-learn, Power BI, Tableau, data modelling, data warehousing.

DevOps & CI/CD – Jenkins, Git, GitHub Actions, Docker containerization, CI/CD pipelines, change-control management, deployment automation.

Production Support & Monitoring – Splunk, Dynatrace, CloudWatch, incident response, SLA management, distributed tracing, performance optimization, log analysis.

Payments & Financial Services Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2 compliance, Open Banking, payments reconciliation, transaction processing, tokenization.

AI & Automation Engineering – Claude API, Anthropic SDK, prompt engineering, LLM integration, workflow orchestration, API-driven automation, JSON-structured data generation.

Enterprise & Regulatory Compliance – GDPR, data protection, regulatory audit trails, ERP integration, UAT coordination, cross-functional collaboration, business-system support.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments-Operations Dashboard (HCL Technologies)

- Built and maintained a real-time **SWIFT messaging dashboard** processing **500K+ payment messages daily** for a Tier-1 banking client, implementing **MT/MX message parsing** and **ISO 20022 compliance validation** to ensure **SEPA** and **cross-border payment** accuracy.
- Engineered **Java Spring Boot backend APIs** and **Power BI operational dashboards** providing transaction-flow visibility, payment-status tracking, and **regulatory audit trail** reporting for **GDPR** and **PSD2** compliance audits.
- Reduced payment-reconciliation time by **40%** through **SQL-based data validation** and **Python ETL automation**, and maintained **99.95% SLA uptime** via **Dynatrace monitoring** and **CloudWatch alerting** with **30-minute P1 incident resolution**.

Ireland Jobs Tracker – AI Resume Generation Platform (Personal Project)

- Architected end-to-end **Claude API integration** with **prompt engineering** to autonomously generate job-description-tailored resumes at scale, implementing **JSON-structured prompt guardrails** and **constraint-based content generation** for **100+ JD variants**.
- Orchestrated multi-stage workflow automation: **Apify web scrapers** → **JD ingestion** → **Claude-powered content synthesis** → **reportlab PDF generation** → **GitHub Actions CI/CD** → **Vercel deployment**, demonstrating **full-stack AI automation** and **API-driven workflow design**.
- Deployed production system handling **10K+ monthly resume generations** with **structured JSON output validation**, **error handling**, and **CI/CD automation**, showcasing hands-on expertise in **LLM integration**, **prompt engineering**, and **scalable automation architecture**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
