PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Provided **2nd level network infrastructure support** across enterprise production environments at HCL Technologies, diagnosing and resolving **routing, switching, and firewall** incidents via **ServiceNow** ticketing platform with **99.5% SLA adherence** on critical financial services systems.
- Configured and troubleshooted **routers, switches, firewalls, and load balancers (Cisco, Palo Alto, F5)** across multi-site banking infrastructure, implementing **OSPF, BGP, EIGRP, NAT, LACP, CDP, UDLD, VPC, and DNS** protocols to ensure uninterrupted business operations for capital markets and payments divisions.
- Performed analysis of **network alerts and events** from monitoring platforms (**Splunk, Dynatrace, CloudWatch**) during on-call rotations and shift schedules, collaborated with senior network engineers on root-cause analysis and remediation, reducing MTTR by **35%** on high-priority incidents.
- Owned network infrastructure **projects and implementations** including system installations, telecommunications room maintenance, vendor coordination for network components, and **disaster recovery planning** across **Trale, US, Canada, and Latin America** sites; documented test plans and quality standards for all network changes.
- Implemented **load balancing, cloud integrations, and network automation** scripts in **Python** for provisioning, configuration management, and scheduled network operations; conducted security audits and threat assessments on IT systems, reporting on breaches and recommending mitigation strategies.
- Supported **telecom infrastructure and logistics** across SMBC Americas Division capital markets and Nikko operations; performed scheduled maintenance, change-control management, and UAT coordination with cross-functional teams during system rollouts and post-implementation support cycles.

SKILLS

Network Infrastructure & Protocols – routing (OSPF, BGP, EIGRP), switching, VPC, LACP, CDP, UDLD, NAT, DNS, DHCP, firewall configuration, load balancing (F5, Gigamon).

Network Equipment & Vendors – Cisco, Palo Alto, Checkpoint, F5, Gigamon, firewall security, intrusion detection.

Monitoring & Incident Management – ServiceNow, Splunk, Dynatrace, CloudWatch, alert analysis, SLA management, on-call rotation, shift scheduling.

Cloud & Automation – AWS (EC2, S3, Lambda, CloudWatch), network automation scripting, Python, Docker, CI/CD (Jenkins, Git).

IT Systems & Security – disaster recovery planning, security threat assessment, breach reporting, quality assurance, test plan development, system installations.

Domain Expertise – capital markets, banking operations, payments processing, telecommunications infrastructure, multi-site network operations, vendor management.

Professional Skills – 2nd level technical support, troubleshooting, root-cause analysis, change management, cross-functional collaboration, documentation.

EDUCATION AND TRAINING

PROJECTS

Enterprise Banking Network Infrastructure & Monitoring (HCL Technologies)

- Provided 2nd level network support and incident management for a mission-critical **SWIFT payments messaging and operations dashboard** serving global capital markets and banking operations clients, handling **P1/P2 network incidents** with **99.5% uptime SLA**.
- Configured and maintained **routing protocols (OSPF, BGP, EIGRP), firewall rules (Palo Alto, Checkpoint), load balancers (F5), and network switching (Cisco)** across multi-region infrastructure supporting **telecom rooms, system installations, and disaster recovery** for SMBC Americas offices.
- Analyzed **network alerts and events** from **Splunk, Dynatrace, and CloudWatch** monitoring platforms, collaborated with senior engineers on root-cause analysis, and documented test plans and quality standards for network changes; reduced mean time to resolution (MTTR) by **35%**.
- Executed **scheduled maintenance, vendor coordination, security threat assessments, and breach reporting**; authored **disaster recovery plans** and conducted system testing across telecommunications infrastructure to ensure business continuity and regulatory compliance.

Network Automation & Cloud Integration Framework (HCL Technologies)

- Developed **network automation scripts in Python** for provisioning, configuration management, and scheduled operations across multi-site capital markets infrastructure; integrated **AWS (EC2, S3, Lambda)** cloud services with on-premise network equipment.
- Built **CI/CD pipelines using Jenkins and Git** for network configuration version control and automated deployments; containerized network tools using **Docker** to standardize environments and accelerate infrastructure rollouts.
- Conducted **security audits and threat assessments** on IT systems, identified vulnerabilities, proposed mitigation strategies, and documented compliance with banking regulatory requirements; implemented load balancing and network redundancy across Tralee and international sites.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
