PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Provided **software applications support and issue troubleshooting** for enterprise Java Spring Boot and .NET applications serving 4,000+ users across banking and financial services environments; resolved P1/P2 incidents with **99.5% SLA compliance** using **Splunk, CloudWatch, and Dynatrace** for root-cause analysis and application administration.
- Managed **application configuration changes and system testing** across interconnected enterprise business systems including ERP modules and operational platforms; coordinated UAT cycles, post-go-live support, and change-control workflows for **15+ integrated applications** with zero critical post-implementation defects.
- Developed and maintained **Python automation scripts and ETL data pipelines** for application monitoring, scheduled reporting, and supplier ticket automation; built **SQL-based data validation workflows** across PostgreSQL, MySQL, and Oracle to ensure application data integrity and **reduce manual support effort by 30%**.
- Engineered **REST API integrations** connecting applications to external suppliers and operational platforms; implemented **Docker containerisation** for consistent application deployment and troubleshooting environments across development and production infrastructure.
- Configured and deployed **CI/CD pipelines using Jenkins and Git** to automate application builds, testing, and releases; established code-review processes and branching strategies that reduced deployment-related incidents by **40%** and accelerated application support response times.
- Collaborated with business stakeholders, domain subject-matter experts, and application suppliers on requirements gathering, user acceptance testing, and training-material development; documented application workflows, troubleshooting procedures, and operational runbooks in **Confluence** for handover to support teams.

SKILLS

Application Support & Administration – software applications support, issue troubleshooting, application administration, application configuration, supplier liaison, change-control management, production support, incident response.

Monitoring & Observability Tools – Splunk, CloudWatch, Dynatrace, application performance monitoring, log analysis, alerting, operational dashboards.

Programming & Scripting – Python, Java Spring Boot, SQL, shell scripting, REST API development, data validation, query optimization.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, ETL pipelines, data warehousing, schema changes, ad-hoc queries, data integrity.

DevOps & Cloud Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD pipelines, Linux, deployment automation.

Enterprise Systems & Integration – ERP integration support, interconnected systems, cross-system data flows, application integration, business-system configuration.

Healthcare & Domain Knowledge – healthcare IT operations, regulatory compliance, GDPR, audit trails, operational alerting, SLA management, cross-functional healthcare IT teams.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Payments Operations Dashboard (HCL Technologies)

- Delivered **production support and application administration** for a mission-critical SWIFT messaging and payments-operations dashboard supporting a major banking client; managed real-time transaction monitoring, operational alerting, and SLA compliance for **100,000+ daily payment messages**.
- Implemented **Splunk and Dynatrace monitoring dashboards** to track payment-message flows, transaction status, and system health; automated alert routing to suppliers and operations teams, reducing mean-time-to-resolution (MTTR) by **25%** for critical payment-processing incidents.
- Configured application settings and performed **change-control management** for SWIFT MT/MX message format updates, ISO 20022 compliance changes, and SEPA/cross-border payment processing enhancements; coordinated UAT with banking-domain business analysts and regulatory stakeholders to ensure audit-trail integrity and GDPR compliance.
- Developed **Python automation scripts** for reconciliation workflow validation, payment-message schema verification, and PSD2/Open Banking API integration testing; reduced manual support workload by **35%** and improved data-validation accuracy to **99.9%**.

ERP Application Integration & Support (HCL Technologies)

- Provided **software applications support and troubleshooting** for enterprise ERP and business-system integrations across banking operations; diagnosed and resolved application configuration issues, data-flow breakdowns, and system connectivity problems affecting **500+ end users**.
- Engineered **REST API integrations** and **SQL-based data flows** connecting ERP modules to payment-processing platforms and operational databases; ensured data consistency across PostgreSQL, Oracle, and MySQL systems through **change-control procedures and supplier coordination**.
- Designed and maintained **Confluence documentation** including application runbooks, troubleshooting guides, configuration procedures, and user training materials; facilitated knowledge transfer to L2/L3 support teams and business stakeholders during system go-live and post-implementation phases.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
