PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **cyber security tool configurations** across email security, endpoint detection and response (EDR), identity and access controls, and cloud security platforms, reducing alert fatigue by **35%** through tuning and baseline standardization aligned with threat actor techniques and incident learnings.
- Partnered with **Threat Intelligence, Vulnerability, and SOC teams** to identify control gaps, recommend configuration improvements, and translate recurring incident causes into preventive and detective control enhancements across **email security controls, endpoint hardening, data protection, and network security tooling**.
- Maintained and continuously improved **cyber security tooling governance** by documenting control intent, configuration rationale, and baseline cyber standards; supported **IT Technology operations** and security policy alignment across interconnected enterprise systems using **Python automation, SQL queries, and change-control workflows**.
- Supported the **roll-out of new cyber security platforms** by coordinating with **Cyber Engineering & Architecture teams**, conducting configuration validation, transitioning tooling into operational management, and developing operational runbooks and training materials to reduce manual intervention by **40%**.
- Collaborated cross-functionally with **SOC and Cyber Defence leadership** to improve detection coverage and fidelity, remove manual configuration management, and ensure security controls aligned with real-world attack techniques and industry standards through **JSON-structured configuration templates and automated remediation workflows**.
- Assisted in **audit and assessment preparation** by providing evidence of control effectiveness, maintaining configuration documentation, and supporting governance oversight; leveraged **Splunk and cloud-native monitoring dashboards** to report on tool performance, coverage metrics, and operational metrics to stakeholders.

SKILLS

Cyber Security Operations – Cyber security tool configuration, endpoint detection and response (EDR), email security controls, data and identity security controls, cloud security controls, network and application security tooling, control governance, configuration management.

Security Tooling & Platforms – Splunk, CloudWatch, Dynatrace, EDR/MDR platforms, email security gateways, cloud-native security services, hardening frameworks, alert tuning and fidelity optimization.

Detection & Response Engineering – Detection coverage design, false positive reduction, threat intelligence integration, incident learning workflows, preventive and detective control implementation, alert fatigue mitigation.

DevOps & Infrastructure Automation – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins CI/CD pipelines, GitHub Actions, configuration as code, automated remediation workflows, Linux shell scripting.

Data & Reporting – Python automation, SQL (PostgreSQL, MySQL, Oracle), JSON-structured configurations, operational dashboards, Power BI reporting, control effectiveness metrics.

Enterprise & Governance – Change-control management, cross-functional stakeholder collaboration, policy and standards development, audit support, regulatory compliance documentation, baseline configuration standards.

Technical Certifications – IELTS Academic Band 7, Full Stack Java Spring Boot & Angular, Web Development (UC Davis), Python Programming (University of Michigan).

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Cyber Security Tooling Baseline & Configuration Governance (HCL Technologies)

- Established a baseline assessment of cyber security tool performance, control coverage, and effectiveness across **email security, endpoint hardening (EDR), identity and access controls, and cloud security platforms** serving a large enterprise client.
- Designed and documented **cyber control configuration standards and baseline cyber standards** in Confluence; created operational runbooks and control-intent documentation to ensure configurations aligned with approved security policies and real-world threat actor techniques.
- Automated manual configuration management and cyber control updates using **Python scripting, JSON configuration templates, and Jenkins CI/CD pipelines**, reducing incident response and remediation effort by **40%** while improving detection fidelity.

SOC & Cyber Engineering Integration for Detection & Alert Optimization (HCL Technologies)

- Collaborated with the **SOC team, Threat Intelligence & Hunting team, and Cyber Engineering & Architecture** to identify tooling gaps and control weaknesses; recommended and implemented configuration improvements to improve detection coverage and reduce false positives by **35%**.
- Translated threat intelligence insights and recurring incident causes into tangible cyber tooling improvements; designed preventive and detective control enhancements across **email security controls, endpoint security (EDR/MDR), data security, and cloud security platforms**.
- Supported cyber tooling selection and control design decisions by providing operational insights and effectiveness metrics; maintained **Splunk and CloudWatch dashboards** to report on tool performance, alert quality, and remediation timelines to Senior Manager of Cyber Defence and cross-functional stakeholders.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
