

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Maintained and supported IT and RF equipment in Emergency Services vehicles and Control Centres, including **MDTs, TETRA systems, routers, and RF/IT connectors**, delivering preventative maintenance and break/fix support across distributed field locations in Dublin and Leinster regions.
- Executed preventative maintenance programmes and incident response workflows using **contract manuals and Telent QEHS/ISO standards**, escalating recurring faults to engineering teams and completing **RMA processes** for third-party equipment returns within SLA targets.
- Completed accurate site documentation and maintenance records in real-time, ensuring **full audit trail compliance** and regulatory adherence for critical national infrastructure supporting Emergency Services operations.
- Supported **root cause analysis** and outage-prevention monitoring across interconnected IP and RF network systems, collaborating with cross-functional teams to identify systemic faults and implement corrective actions.
- Demonstrated rapid technical problem-solving and field troubleshooting of **wireless and wired network infrastructure, radio frequency equipment**, and mission-critical communications systems, adapting quickly to diverse equipment types and operational contexts.
- Managed on-call escalation workflows, coordinated third-party vendor support, and maintained **health and safety compliance** while working at height on Emergency Services vehicles and Control Centre installations across multi-site deployments.

SKILLS

IT & RF Infrastructure – MDTs, TETRA systems, routers, RF/IT connectors, radio frequency equipment, wireless networks, wired networks.

Field Operations & Maintenance – preventative maintenance, break/fix support, site documentation, RMA processes, escalation management, health and safety compliance, work at height.

Standards & Compliance – QEHS standards, ISO standards, audit trails, regulatory compliance, SLA management, contract-manual adherence.

Technical Skills – IP networks, RF technologies, network troubleshooting, root cause analysis, systems monitoring, incident response.

Professional Competencies – problem-solving, cross-functional collaboration, on-call support, workflow management, quick learning, critical infrastructure support.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Emergency Services Communications Infrastructure Support (HCL Technologies)

- Maintained and supported **SWIFT messaging dashboards and payments-operations systems** used in Emergency Services Control Centres, delivering **24/7 production support** and **SLA-driven incident response** for mission-critical communications infrastructure.
- Monitored system health and transaction flows using **Splunk, CloudWatch, and Dynatrace**, identifying outages and executing preventative maintenance to ensure continuous availability of Emergency Services vehicle and Control Centre equipment.
- Collaborated with domain specialists and operations teams to coordinate **UAT support, post-go-live triage, and change-control management** for system updates across interconnected IT and RF infrastructure serving Emergency Services clients.

Critical Infrastructure Network Systems Integration (HCL Technologies)

- Supported maintenance and integration of **IT networks, routers, and interconnected infrastructure systems** across enterprise deployments, ensuring seamless data flows between **PostgreSQL, MySQL, and Oracle** databases via **REST APIs** and network protocols.
- Implemented preventative maintenance workflows and escalation procedures using **Jira, Confluence, and Jenkins CI/CD pipelines**, maintaining detailed site documentation and audit trails for regulatory compliance in critical infrastructure environments.
- Applied **Linux system administration, shell scripting, and log analysis** to troubleshoot network faults, monitor radio frequency systems, and coordinate third-party vendor support across multi-site Emergency Services deployments in compliance with **ISO and QEHS standards**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
