PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **AI-assisted vulnerability triage tooling** using **Python, FastAPI, and LLM-backed agents** to pre-classify and deduplicate bug bounty reports, reducing manual intake workload by **60%** and routing critical findings to engineering teams with reproduction context in **24 hours**.
- Monitored and responded to **EDR and cloud security alerts** across **AWS (EC2, CloudWatch, Lambda)** infrastructure; investigated, contained, and documented **P1/P2 incidents** with **99.2% SLA adherence**, improving mean-time-to-resolution by **35%** through alert enrichment and context correlation.
- Built **LLM-backed investigation copilots and Slack bots** that pulled alert context from **Splunk, Dynatrace, and SIEM data sources**, correlating signals across logs and security events to surface actionable threat intelligence and reduce analyst triage time by **45%**.
- Developed **response tooling and automation workflows** using **Python scripting, Jenkins CI/CD, and REST APIs** to draft remediation steps, track vulnerability fixes to closure, and enforce **SLA compliance** for critical and high-severity issues; integrated with ticketing systems for cross-functional stakeholder visibility.
- Tuned **DLP, SIEM, and cloud security detection rules**; eliminated **70% of false-positive alerts** through threshold optimization and baseline enrichment, enabling responders to focus on genuine threats and reducing alert fatigue across the security operations center.
- Analyzed **darkweb findings and credential exposures**; shaped darkweb monitoring practices and tooling by building automated ingestion pipelines using **Python, SQL (PostgreSQL), and data warehousing** to track posture over time, reducing exposure-to-detection window from **14 days to 3 days**.

SKILLS

Security Operations & Incident Response – vulnerability triage, EDR monitoring, threat investigation, darkweb analysis, credential exposure tracking, incident response workflows, SLA management, P1/P2 escalation.

Security Tooling & Automation – AI-assisted triage agents, LLM-backed copilots, Slack bot development, investigation tooling, response automation, vulnerability tracking, alert enrichment, SIEM tuning.

Cloud & Infrastructure Monitoring – AWS (EC2, CloudWatch, Lambda), Splunk, Dynatrace, EDR platforms, DLP configuration, SIEM rule tuning, alert correlation, cloud security posture.

Backend Development & Integration – Python, FastAPI, Flask, REST APIs, Jenkins CI/CD, Git, data pipelines, ETL, SQL (PostgreSQL, MySQL, Oracle), Java Spring Boot, Docker containerization.

Data Analysis & BI Tooling – Power BI dashboards, DAX measures, data modelling, Tableau, SQL queries, exploratory data analysis, threat signal correlation, posture tracking dashboards.

Certifications & Core Competencies – IELTS Academic (Band 7), Full Stack Java Spring Boot & Angular, Web Development (Coursera), Python Programming (Coursera), MSc Data Analytics (NCI), BE Computer Science.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

AI-Powered Security Triage & Response Platform (HCL Technologies)

- Architected and shipped an end-to-end **LLM-backed vulnerability triage platform** that ingested **bug bounty reports, DAST findings, and EDR alerts** via REST APIs and **automated duplicate detection, spam filtering, and abuse flagging** using **Python, FastAPI, and prompt-engineered LLM agents**.
- Integrated **Splunk and SIEM data sources** to build **investigation copilots** that enriched alerts with context (log excerpts, correlated signals, asset metadata) and drafted remediation steps; deployed as a **Slack bot** accessed by **50+ security analysts**, reducing triage time by **50%**.
- Implemented automated **SLA tracking and remediation workflows** using **Jenkins CI/CD pipelines and SQL (PostgreSQL)** to monitor critical vulnerability closure timelines; surfaced stakeholder dashboards in **Power BI** that tracked remediation velocity and engineering team accountability, achieving **95% on-time closure for critical findings**.
- Developed **darkweb monitoring ingestion pipeline** using **Python pandas, SQL ETL, and automated scheduling** to ingest credential exposures and threat signals; built a **Tableau dashboard** tracking exposure-to-detection latency, reducing response window from **14 days to 3 days** and preventing **8 live breach incidents** in Q4.
- Optimized **SIEM and DLP rule tuning** through statistical analysis and anomaly detection models; reduced false-positive alert volume by **70%** and improved precision of critical-severity alerts to **92%**, enabling security operations to scale response capacity without additional headcount.

Payments Operations Dashboard & Vulnerability Remediation Tracking (HCL Technologies – Banking Domain)

- Supported and iterated on a **SWIFT messaging and payments-operations security dashboard** that monitored **MT/MX message flows, ISO 20022 transaction processing, and SEPA/cross-border payment channels**; added vulnerability remediation tracking features to flag compliance gaps and SLA violations in real time.
- Coordinated **UAT and post-implementation security testing** across banking client infrastructure; documented **50+ vulnerabilities** across payment systems, worked with engineering teams to prioritize fixes, and re-tested remediation in lower environments before production deployment, maintaining **GDPR and regulatory audit trail requirements**.
- Built **Power BI dashboards** aggregating **EDR alerts, credential exposures, and payment-system incident logs** for stakeholder reporting; tracked **SLA adherence on critical remediation tasks** and surfaced risk trends to compliance and operations teams, enabling faster escalation and management decision-making.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
