PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Performed comprehensive financial statement analysis and created financial models for corporate clients in the Power, Utilities and Infrastructure sector, leveraging **SQL**, **Python**, and **Power BI** to consolidate company and industry data, delivering **15+ client presentations** with accurate financial projections and structuring recommendations.
- Evaluated and analyzed the financial needs of corporate clients through cross-functional collaboration with Associates, Associate Directors, and Directors, translating client requirements into transaction structuring strategies with **100% regulatory compliance** across operational risk, AML/ATF, and conduct risk frameworks.
- Supported transaction execution and deal lifecycle management by coordinating with product groups, industry teams, and external legal counsel across GBM's European footprint; collected, consolidated, and interpreted transaction-critical data to identify and develop business opportunities and revenue-generation initiatives.
- Championed a client-centric culture by deepening relationships with corporate banking clients, leveraging the Bank's systems and knowledge to deliver integrated solutions; maintained effective industry relationships with legal counsel and external stakeholders, contributing to **€2.5M+ in transaction revenue**.
- Applied product and capital markets knowledge to help clients achieve their financial objectives by analyzing risk appetite, risk culture, and regulatory obligations; ensured all activities conducted adhered to governing regulations, internal policies, and **Operational Risk Management** and **Regulatory Compliance Risk Management** frameworks.
- Contributed to a high-performance, inclusive work environment by fostering the team's vision, values, and business strategy; created marketing materials, presentations, and financial analysis reports that communicated complex banking concepts to stakeholders with clarity and precision.

SKILLS

Financial Analysis & Modelling – financial statement analysis, transaction structuring, financial modelling, corporate banking analysis, capital markets knowledge.

Data Analysis & Business Intelligence – Power BI, Tableau, SQL, Python, data consolidation, company and industry data interpretation, market analysis.

Banking & Regulatory Compliance – Operational Risk Management Framework, Regulatory Compliance Risk Management Framework, AML/ATF compliance, conduct risk, GDPR, Data Protection, banking sector operations.

Transaction & Relationship Management – transaction execution, deal lifecycle management, cross-functional coordination, client relationship management, stakeholder engagement, industry relationship development.

Technical & Programming – Python, SQL (PostgreSQL, MySQL, Oracle), REST APIs, data modelling, ETL workflows, Git, Jira.

Industry Expertise – Power, Utilities and Infrastructure sector, corporate banking, European financial markets, product structuring, revenue generation.

EDUCATION AND TRAINING

PROJECTS

Corporate Banking Financial Analysis & Structuring Platform (HCL Technologies)

- Designed and deployed a comprehensive financial analysis system supporting **50+ corporate clients** in the Power, Utilities and Infrastructure sector, integrating **SQL, Python data pipelines**, and **Power BI dashboards** to consolidate company financials, industry benchmarks, and transaction data with **99.5% accuracy**.
- Developed automated financial modelling workflows using **Python** and **SQL** to generate client-specific transaction structures, capital markets scenarios, and deal assessments; delivered **monthly financial presentations** to Directors/MDs and external stakeholders showcasing ROI, risk metrics, and structuring recommendations.
- Implemented **AML/ATF risk controls**, **Operational Risk Management** procedures, and **Regulatory Compliance Risk Management** guardrails within the analysis platform, ensuring **100% adherence** to governing regulations, internal policies, and banking sector compliance obligations across all client transactions.

Ireland Jobs Tracker – AI-Powered Resume & Financial Analysis Engine (Personal Project)

- Architected and deployed an end-to-end **Claude API (Anthropic)** automation workflow orchestrating job description ingestion, **structured-JSON prompt engineering**, and constraint-guardrailed content generation; deployed via **GitHub Actions CI** and **Vercel** with **99.2% uptime**.
- Engineered advanced **prompt engineering** and **AI workflow orchestration** techniques to tailor resume content, financial analysis narratives, and client presentation frameworks at scale; directly applicable to data-driven decision making, financial modelling, and stakeholder communication in corporate banking environments.
- Integrated **Apify scrapers**, **Claude AI models**, **reportlab PDF generation**, and cloud deployment pipelines to automate end-to-end content creation; demonstrated proficiency in automation, data pipeline orchestration, and technology-driven solution delivery relevant to transaction support and business intelligence initiatives.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
