PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed **standard data extracts** (Spos 4x, Standard Trade, Taxlot equivalents) and **outbound reporting interfaces** for enterprise financial applications, investigating and resolving file generation and data quality issues with **95%+ first-contact resolution rate**.
- Designed and maintained **electronic data interfaces** exchanging portfolio data, trade processing, and position data across interconnected systems using **REST APIs, SQL** (PostgreSQL, MySQL, Oracle), and **ETL pipelines**, ensuring **zero SLA breaches** in production environments.
- Provided **level one and escalation support** for standard extract troubleshooting, communicating technical issues and resolutions to internal Operations teams, Client Integration partners, clients, and external vendors with clear documentation and root-cause analysis.
- Configured and deployed **data reconciliation workflows** and **outbound reporting jobs** using **Python automation scripts, Jenkins CI/CD pipelines**, and scheduled **data validation routines**, reducing manual reconciliation effort by **40%** and improving turnaround time by **3 days**.
- Led **client onboarding initiatives** for new reporting interfaces, coordinating with business stakeholders, operations teams, and technology partners to translate requirements into production-ready configurations; supported **12+ client go-lives** with zero critical incidents.
- Demonstrated proactive problem-solving and process optimization by analyzing **data extract logs** and operational dashboards, identifying automation opportunities, and collaborating with technology teams to implement efficiency improvements that reduced operational overhead by **30%**.

SKILLS

Data Operations & Reporting – standard extracts (Spos 4x, Standard Trade, Taxlot), outbound reporting interfaces, data reconciliation, file generation and data quality management, extract configuration and maintenance.

Programming & Scripting – Python, SQL (PostgreSQL, MySQL, Oracle), shell scripting, ad-hoc queries, data validation, schema changes.

Data Engineering & ETL – ETL pipeline development, data exchange flows, electronic interfaces, data warehousing, Python data stack (pandas, NumPy), Power Query.

Financial Systems & Instruments – hedge fund administration, portfolio data management, trade processing, position monitoring, SWIFT messaging (MT/MX), ISO 20022 message flows, payments and reconciliation workflows.

DevOps & Infrastructure – Jenkins CI/CD pipelines, Git version control, Docker containerization, AWS (EC2, S3, Lambda, CloudWatch), Linux shell operations, log analysis.

Operational Support & Monitoring – application monitoring (Splunk, CloudWatch, Dynatrace), SLA management, incident response, production support, troubleshooting and root-cause analysis.

Business Intelligence & Analytics – Power BI dashboards, Tableau interactive reporting, data modelling, operational dashboards, Power Query ETL, published reports for stakeholders.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments Operations & Data Extract Dashboard (HCL Technologies)

- Designed and deployed **outbound reporting dashboards** for a banking client's payments operations platform, managing **SWIFT message flows** (MT/MX formats), **ISO 20022 message structures**, and **SEPA/cross-border payment reconciliation data** with real-time position visibility and operational alerting.
- Configured **electronic data interfaces** and **standard extract routines** to exchange trade data, pricing data, and settlement instructions to downstream systems and client-facing portals, ensuring **100% data accuracy** and **SLA compliance** in a regulated financial services environment.
- Implemented **Python ETL pipelines** and **SQL-based reconciliation scripts** to validate **ISO 20022 message completeness**, detect payment anomalies, and generate **audit-trail reports** for regulatory compliance (GDPR, Data Protection); supported UAT coordination and post-go-live troubleshooting across **8 client go-lives**.

Enterprise Data Integration & Outbound Reporting Automation (HCL Technologies)

- Engineered **automated data extract jobs** for enterprise resource planning (ERP) and operational systems, orchestrating **REST API integrations**, **database-level data flows**, and **Jenkins CI/CD pipelines** to manage outbound reporting to clients and internal stakeholders with **zero manual intervention**.
- Developed **Python automation scripts** for standard extract generation, file validation, and error detection; implemented **scheduled reporting routines** and alerting mechanisms that **eliminated 95%** of manual data quality checks and reduced reporting latency by **50%**.
- Collaborated with Client Integration teams and operations partners to troubleshoot **file generation issues**, diagnose **data interface failures**, and implement corrective actions; maintained comprehensive **runbooks and configuration documentation** to support **seamless 24/7 global operations** across Asia Pacific, Europe, and North America time zones.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
