PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **least privilege access policies** and **role-based access control (RBAC)** frameworks across enterprise cloud environments, reducing unauthorized access incidents by **40%** and enforcing security-first governance for **500+** cloud-connected applications.
- Implemented **Infrastructure as Code (IaC)** using **Terraform** and **Azure Resource Manager (ARM)** templates to provision and manage IAM cloud resources, achieving **95%** infrastructure consistency and enabling repeatable, auditable deployments across **AWS** and **Azure** cloud platforms.
- Developed and maintained **Azure Identity** governance frameworks including **Azure AD / Entra ID** integration, **conditional access policies**, and **multi-factor authentication (MFA)** controls; conducted periodic access reviews and monitored user activity to maintain compliance with regulatory requirements.
- Built **disaster recovery** and **data backup strategies** using **Azure Site Recovery** and **Azure Backup** services, reducing RTO by **60%** and ensuring business continuity across critical cloud workloads and on-premises hybrid environments.
- Established **CI/CD pipelines** using **Git**, **Jenkins**, and **Azure DevOps** to enable automated, secure software deployment; collaborated with development teams to implement **Infrastructure as Code** validation gates and access control enforcement at build time.
- Monitored, logged, and analyzed system performance using **Azure Monitor**, **Azure Log Analytics**, and **Application Insights** to maintain system health, optimize cloud costs by **25%**, and drive continuous improvement in cloud security, reliability, and scalability.

SKILLS

Cloud Platforms & Infrastructure – Azure (Identity, Monitor, Log Analytics, Site Recovery, Backup, DevOps, Resource Manager), AWS (EC2, S3, Lambda, CloudWatch), Infrastructure as Code (Terraform, ARM templates), disaster recovery, data backup strategies.

Identity & Access Management (IAM) – Azure AD / Entra ID, least privilege access policies, role-based access control (RBAC), conditional access policies, multi-factor authentication (MFA), identity governance frameworks, access reviews, user activity monitoring.

DevOps & CI/CD – Git, Jenkins, Azure DevOps, CI/CD pipeline development, automated deployment, infrastructure validation, Docker, containerization, cloud-native services.

Cloud Security & Compliance – cloud identity governance, IAM cloud compliance, regulatory requirements enforcement, audit trails, security controls, cloud migration, cloud modernization.

Monitoring & Operations – Azure Monitor, Azure Log Analytics, Application Insights, system performance monitoring, cost optimization, operational alerting, logging and analysis.

Programming & Data Engineering – Python, Java, SQL (PostgreSQL, MySQL, Oracle), REST APIs, system integrations, data pipelines, ETL development.

Enterprise & Domain Knowledge – change-control management, enterprise business systems, cross-functional collaboration, UAT coordination, post-implementation support, SLA management.

EDUCATION AND TRAINING

PROJECTS

Cloud IAM Governance & Least Privilege Framework (HCL Technologies)

- Architected and deployed enterprise-wide **least privilege access policies** and **role-based access control (RBAC)** across **Azure** and **AWS** cloud environments for banking and financial services clients, eliminating over-provisioned permissions and reducing lateral movement risk.
- Implemented **Azure AD / Entra ID** conditional access policies, **multi-factor authentication (MFA)**, and **identity governance** frameworks; conducted quarterly **access reviews** and monitored user activity to enforce regulatory compliance and prevent unauthorized access.
- Developed **Terraform**-based **Infrastructure as Code (IaC)** modules to automate **IAM** resource provisioning, reducing manual configuration errors by **85%** and enabling consistent enforcement of security guardrails across **50+** cloud subscriptions.

Disaster Recovery & CI/CD Pipeline Automation (HCL Technologies)

- Designed and operationalized **disaster recovery** and **data backup strategies** using **Azure Site Recovery** and **Azure Backup**, achieving **60-minute RTO** and **30-minute RPO** for mission-critical banking systems serving **1000+** users.
- Built secure **CI/CD pipelines** using **Git**, **Jenkins**, and **Azure DevOps** that enforce **least privilege access** and **infrastructure validation** at build time; collaborated with development teams to integrate **Infrastructure as Code** checks and automated compliance scanning.
- Monitored system performance and cost using **Azure Monitor**, **Azure Log Analytics**, and **Application Insights**, identifying optimization opportunities that reduced cloud costs by **25%** and improved application reliability SLAs to **99.95%** availability.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
