PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **full-stack software engineering curricula** for undergraduate and postgraduate programmes, teaching core CS concepts including **distributed systems architecture**, **software engineering lifecycle**, and **secure coding practices** to cohorts of 50+ students; achieved **92% student satisfaction** on course evaluations through hands-on labs and industry-aligned case studies.
- Led research initiatives in **cybersecurity and software engineering**, publishing **3 peer-reviewed papers** in IEEE and ACM venues on incident response automation, production monitoring frameworks, and resilience patterns in enterprise systems; secured **€85K in research funding** from EU Digital Health and Applied AI projects.
- Mentored **15+ postgraduate research students** and **8 undergraduate capstone teams** on distributed systems design, API security, and data engineering pipelines; **100% of mentees** progressed to industry or doctoral positions within 12 months of graduation.
- Architected and taught a new **Software Engineering for Financial Systems** module covering **SWIFT messaging (MT/MX standards)**, **ISO 20022 compliance**, **SEPA payment flows**, and **regulatory frameworks (GDPR, PSD2)**; enabled **8 student internships** at leading fintech and banking institutions.
- Contributed to School research initiatives across **Insight Centre for Data Analytics**, **CeADAR AI Lab**, and **UCD Centre for Cybersecurity and Cybercrime Investigation**; co-authored **5 EU project proposals** (Horizon Europe, COST Actions) in ML/AI and distributed systems, with **3 successfully funded**.
- Developed industry partnerships with **15+ technology companies** (fintech, cloud infrastructure, security vendors) for guest lectures, project sponsorships, and placement opportunities; coordinated **quarterly technical seminars** bringing practising engineers into the classroom to bridge academia–industry knowledge gaps.

SKILLS

Software Engineering & Systems Design – distributed systems architecture, microservices, REST API design, system integration, software development lifecycle, design patterns, software reliability.

Cybersecurity & Compliance – incident response, secure coding practices, GDPR compliance, PSD2 regulatory frameworks, data protection, risk assessment, security auditing.

Programming Languages & Frameworks – Java Spring Boot, Python, SQL, PostgreSQL, MySQL, Oracle, Flask, FastAPI, R, shell scripting.

Cloud & DevOps Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker containerisation, Kubernetes, CI/CD pipelines, Jenkins, Git, Linux systems administration.

Data Engineering & Analytics – ETL pipeline development, data warehousing, Power BI dashboards, Tableau visualisation, pandas, NumPy, scikit-learn, statistical analysis, machine learning.

Domain Expertise – financial services systems, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA instant payments, payments processing, ERP integration, production monitoring (Splunk, Dynatrace).

Teaching & Academic Leadership – curriculum design, postgraduate supervision, research mentorship, student assessment, cross-disciplinary collaboration, knowledge dissemination, public engagement.

EDUCATION AND TRAINING

PROJECTS

Production Monitoring & Incident Management Platform (HCL Technologies, 2022–2024)

- Designed and deployed enterprise **distributed systems monitoring infrastructure** supporting **SWIFT payments-operations dashboard** for a Tier-1 banking client; integrated **Splunk, Dynatrace, and CloudWatch** for real-time application performance and transaction-flow visibility across **8 interconnected services**.
- Implemented **incident response automation** and **SLA-driven alerting** reducing mean-time-to-detection (MTTD) from **18 minutes to 3 minutes** for P1/P2 production incidents; developed **Python-based automation scripts** for **root-cause analysis** and **log aggregation** across **PostgreSQL, MySQL, and Oracle** databases.
- Mentored **4 junior engineers** on distributed systems troubleshooting, API security, and **GDPR compliance in financial systems**; led **quarterly knowledge-sharing sessions** on **ISO 20022 message structure** and **regulatory audit trails**, raising team capability in payments-domain engineering by **35%**.

Ireland Jobs Tracker – AI-Powered Resume & Workflow Automation (Personal Project, 2024–2025)

- Architected and deployed an end-to-end **AI workflow automation system** integrating **Claude API (Anthropic)**, **Apify web scrapers**, and **reportlab PDF generation**; designed **structured JSON prompt engineering** with constraint guardrails to generate job-description-tailored resumes at scale, demonstrating **advanced LLM orchestration** and **system integration** capabilities.
- Implemented **GitHub Actions CI/CD pipelines** and **Vercel deployment automation** for continuous integration of job-market data, JD ingestion, AI content generation, and report distribution; reduced manual resume-generation time by **87%** across **500+ job postings**.
- Published open-source implementation on GitHub with comprehensive documentation and API examples; project demonstrates **software engineering best practices** in automation, scalability, and reproducibility—directly applicable to academic research dissemination and student capstone projects in software engineering.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
