PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and implemented **QA/QC plans and procedures** for enterprise systems at HCL Technologies, ensuring compliance with ISO 9001 quality standards and project specifications across production environments; documented inspection protocols and test records in centralized quality management systems.
- Conducted **inspection and testing activities** for infrastructure components, materials, and workmanship quality; maintained accurate **quality documentation** including inspection reports, test records, and non-conformance logs across 40+ enterprise projects with zero compliance violations.
- Reviewed and interpreted **technical drawings and specifications** for system integrations and change-control implementations; performed schema validation, architecture reviews, and compliance audits against regulatory requirements including ISO 9001 and data protection standards.
- Liaised with cross-functional site teams, subcontractors, suppliers, and banking-domain business stakeholders to resolve **quality issues** and coordinate UAT activities; participated in root cause analysis and corrective action plans for non-conformances in production environments.
- Assisted in **internal audits and quality reviews** across interconnected enterprise systems; performed post-implementation triage, change-control validation, and quality assurance monitoring using **operational dashboards** (Splunk, Dynatrace, CloudWatch) with **SLA management** and regulatory audit-trail compliance.
- Promoted a culture of **quality and continuous improvement** by documenting best practices in Confluence, conducting code reviews via Git workflows, and participating in Agile/Scrum ceremonies; trained cross-functional teams on quality standards, health and safety protocols, and compliance requirements across international project teams.

SKILLS

Quality Assurance & Control – QA/QC plans and procedures, inspection and testing protocols, quality documentation, technical drawing interpretation, ISO 9001 standards compliance, non-conformance root cause analysis, corrective action plans, internal audits.

Quality Management Systems – quality documentation management, inspection report generation, test record maintenance, SLA management, compliance auditing, change-control validation, post-implementation quality reviews.

Engineering & Technical Analysis – technical specifications review, schema validation, system integration auditing, architectural compliance assessment, data protection and regulatory compliance (ISO 9001, GDPR).

Operational & Monitoring Tools – Splunk, Dynatrace, CloudWatch, Jenkins, Jira, Confluence, MS Office, quality management dashboards.

Stakeholder & Cross-Functional Collaboration – site team liaison, subcontractor coordination, supplier management, UAT coordination, business requirements gathering, international project team leadership.

Data & Analytics – Power BI dashboards, SQL (PostgreSQL, MySQL, Oracle), data modelling, inspection data analysis, compliance metrics reporting, Python scripting for quality workflows.

Domain Expertise – enterprise systems, banking and financial services operations, ERP systems, payments processing, regulatory compliance, health and safety protocols, continuous improvement methodologies.

EDUCATION AND TRAINING

PROJECTS

Enterprise Data Centre Quality Assurance Programme (HCL Technologies)

- Designed and deployed **QA/QC inspection frameworks** for large-scale enterprise infrastructure projects; developed **quality documentation templates** including inspection checklists, test records, and non-conformance forms aligned with ISO 9001 standards.
- Executed **material and workmanship inspections** across interconnected systems; performed compliance validation against technical specifications and project requirements; maintained centralized quality records with **100% audit-trail traceability** for regulatory review.
- Collaborated with site engineering teams, subcontractors, and ERP integration partners to identify and resolve **quality issues**; conducted root cause analysis sessions and implemented corrective action plans; reduced non-conformances by **35%** through systematic process improvements and team training.

Quality Compliance & Audit Dashboard (HCL Technologies & MSc Data Analytics)

- Built a **Power BI operational quality dashboard** integrating production inspection data, test records, and non-conformance metrics from enterprise systems; created **DAX measures** for compliance tracking, SLA adherence, and audit-readiness reporting.
- Implemented **Python ETL workflows** to aggregate quality data from Splunk, Jenkins, and SQL databases; automated daily quality reports and health-check visualizations for cross-functional stakeholder consumption.
- Developed **interactive compliance analytics** enabling site managers and quality leads to monitor inspection progress, track corrective actions, and forecast regulatory audit outcomes; supported post-implementation quality reviews with real-time data visibility.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
