PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **operational readiness frameworks** for payment gateway and integration services at HCL, embedding **monitoring, alerting, and self-healing capabilities** throughout the service lifecycle; reduced Mean Time to Recovery (MTTR) by **40%** through automated incident response and blameless postmortem practices.
- Architected and maintained **CI/CD automation pipelines** using **Jenkins, Groovy, Git, and Bitbucket** for software promotion and operational gating across payment processing platforms; integrated **certificate lifecycle management (Venafi)**, traffic routing rules, and compliance reporting to achieve **99.95% uptime SLA** for production payment flows.
- Configured and operationalized **Dynatrace and Splunk monitoring** infrastructure for payment domain systems including SWIFT messaging dashboards and ISO 20022 transaction flows; implemented **robust logging, alerting, and observability standards** for proactive issue detection and real-time system health visibility across multi-zone deployments.
- Developed **Ansible playbooks and shell scripts** for infrastructure automation, certificate renewal orchestration, configuration management, and compliance-driven operational gating; reduced manual toil by **60%** and improved Safety & Soundness audit readiness through automated PCI compliance reporting and threat remediation workflows.
- Led **incident management and reliability engineering** initiatives for payment gateway integrations with **gRPC event-driven architectures** and **NGINX configuration**; collaborated with development teams on resiliency gap analysis, capacity planning, and velocity optimization; mentored junior engineers on SRE fundamentals and sustainable incident response practices.
- Managed **compliance and risk frameworks** including PCI compliance, GDPR data protection, ITSM defect resolution, and mutual TLS / SSL handshake security standards for banking-domain systems; drove change-control processes and UAT coordination for payment operations systems across interconnected platforms with **AWS (EC2, S3, Lambda)** and **secure access practices**.

SKILLS

DevOps & SRE Tools – Jenkins, Groovy, Ansible, Chef, Venafi, XLR, Bitbucket, Git, shell scripting, certificate lifecycle management.

Monitoring & Observability – Dynatrace, Splunk, CloudWatch, alerting configuration, logging standards, performance monitoring, incident detection.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, secure access practices, cloud-native deployments, infrastructure automation.

Payments & Compliance Domain – Payment gateways, SWIFT messaging (MT/MX), ISO 20022 message flows, gRPC event-driven architectures, NGINX configuration, mutual TLS, SSL handshake, PCI compliance, GDPR, Safety & Soundness frameworks, SEPA, cross-border payments.

Networking & Systems – Client-server relationships, network layers (L1–L7), ITSM processes, incident management, change-control management, mutual TLS, SSH keys, encryption standards.

CI/CD & Automation – Pipeline design, software promotion, operational gating, traffic routing automation, compliance reporting automation, GitHub Actions.

Languages & Data Tools – Python, Java, SQL (PostgreSQL, MySQL, Oracle), REST APIs, Splunk queries, data pipelines, ETL automation.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Payment Operations Dashboard & Lifecycle Automation (HCL Technologies)

- Architected end-to-end **production readiness automation** for SWIFT messaging and ISO 20022 payment gateway integrations, embedding **operational monitoring, alerting, and self-healing** capabilities across the service lifecycle.
- Implemented **Jenkins CI/CD pipelines with Groovy scripting** for payment-domain software promotion, operational gating, and **certificate lifecycle renewal via Venafi**; integrated **Ansible playbooks** for traffic routing, configuration management, and PCI compliance reporting automation.
- Configured **Dynatrace and Splunk** observability and alerting infrastructure for real-time visibility into SWIFT message flows, transaction reconciliation, and payment processor health; reduced Mean Time to Recovery (MTTR) by **40%** through proactive incident detection and blameless postmortem-driven reliability improvements.
- Managed **compliance and risk frameworks** including PCI compliance gates, GDPR data protection controls, and mutual TLS / SSL security standards for payment operations; collaborated with banking-domain stakeholders, regulators, and development teams on resiliency gaps, UAT coordination, and operational enhancement feedback loops.

SRE & Automation Engineering – Enterprise Integration Systems (HCL Technologies)

- Designed and maintained **infrastructure automation frameworks** using **Ansible, shell scripting, and Groovy** for ERP integrations, change-control processes, and operational gating across interconnected business systems; reduced manual toil by **60%** through automated certificate renewal, threat remediation, and compliance reporting.
- Implemented **Splunk and Dynatrace monitoring** standards for enterprise business-system integrations with **AWS (EC2, S3, Lambda)** deployments; configured alerting rules, logging pipelines, and observability dashboards to ensure operational resilience and proactive issue detection across multi-zone production environments.
- Conducted **incident management and capacity planning** for mission-critical payment and ERP systems; practiced sustainable incident response, led blameless postmortems, and optimized system reliability through cross-functional collaboration with development teams, BAs, and operations stakeholders across multiple time zones.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
