PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **React** UI components and **TypeScript**-based frontend modules for enterprise financial applications, enabling rapid feature delivery across Workday's full suite of Financials products and improving user adoption by **40%**.
- Architected **REST API** integrations between frontend UI layers and backend Financials systems using **Spring Boot** and **Java**, ensuring reliable data flow, consistent state management, and enterprise-grade performance across interconnected financial platforms.
- Implemented comprehensive **unit, integration, and system-level testing** across **React** components and API endpoints within **Jenkins** continuous delivery pipelines, achieving **85%+ code coverage** and reducing production defects by **30%**.
- Conducted technical design and architecture reviews for new Financials UI components, demonstrating technical awareness and influencing skills across product teams, operations, and regulatory stakeholders in a highly regulated financial environment.
- Performed peer code reviews, pair programming sessions, and knowledge-sharing activities to advance team technical standards and best practices; mentored junior engineers on **React** component patterns, **TypeScript** type safety, and modern frontend tooling.
- Built interactive prototypes and proof-of-concepts using **React**, **TypeScript**, and **Power BI** dashboards to validate UX improvements and performance enhancements for Financials applications; presented findings to cross-functional stakeholders to inform development roadmap and architecture decisions.

SKILLS

Frontend Development – React, TypeScript, Angular, JavaScript, HTML5, CSS3, responsive design, component architecture, state management.

Backend & API Development – Java, Spring Boot, REST APIs, microservices integration, API design, data serialization, backend systems architecture.

Enterprise Software & Testing – Unit testing, integration testing, system-level testing, Jest, continuous delivery pipelines, CI/CD, test automation, code quality.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, GitHub Actions, deployment automation, infrastructure management.

Data & Business Intelligence – SQL (PostgreSQL, MySQL, Oracle), Power BI, Tableau, data modelling, ETL, DAX, Power Query, analytics dashboards.

Financial Domain & Compliance – Enterprise Financials systems, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, payments processing, regulatory compliance (GDPR), change-control management, UAT coordination.

Collaboration & Methodologies – Pair programming, code reviews, Agile/Scrum, knowledge sharing, technical documentation, cross-functional team engagement, architectural decision-making.

EDUCATION AND TRAINING

PROJECTS

Financials Platform UI Components & API Layer (HCL Technologies)

- Engineered **React** UI component library for enterprise Financials applications, including data tables, form controls, and dashboard widgets, deployed across multiple Workday Financials modules and used by **10,000+** enterprise users globally.
- Developed **REST API** layer in **Spring Boot** and **Java** to abstract Financials backend services, enabling frontend teams to decouple from core systems while maintaining ISO 20022-compliant message flows and SEPA payment processing integrity.
- Implemented **TypeScript**-based type-safe component interfaces and **Jest**-driven unit and integration tests across the Financials UI stack, integrating tests into **Jenkins** CI/CD pipeline and reducing regression defects by **35%** pre-production.
- Collaborated with Financials domain teams, regulatory compliance officers, and cross-functional product managers to translate business requirements into technical designs; participated in architecture review sessions to influence platform roadmap for consumer-grade UX in enterprise Financials.

Ireland Jobs Tracker – Fullstack AI-Driven Resume Generation Platform

- Built end-to-end fullstack web application using **React**, **TypeScript**, and **FastAPI** to automate job-description-tailored resume generation at scale, integrating **Claude API** (Anthropic) with advanced prompt engineering and structured-JSON constraint guardrails.
- Architected **REST API** backend to orchestrate AI workflow pipeline: Apify web-scraper ingestion → job-description parsing → Claude-powered JD-tailored content generation → **reportlab** PDF composition, deployed on **Vercel** with **GitHub Actions** CI/CD automation.
- Designed responsive **React** frontend with **TypeScript** type safety, real-time job tracking dashboard, and user-friendly resume preview interface; implemented **Git** version control, automated testing, and continuous deployment for rapid iteration and zero-downtime updates.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
