PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and analyzed screenshots of enterprise banking dashboards, CRM systems, and payment-operations interfaces across diverse software environments, identifying UI elements, user workflows, and transaction-flow visibility patterns with **99.2% accuracy** in structured annotation tasks.
- Evaluated and annotated AI model responses against observable evidence from admin panels, forms, and SWIFT messaging dashboards, distinguishing between screen-visible data and assumptions while documenting clear, well-reasoned explanations for **2,500+ production-support assessments**.
- Completed structured data review and annotation processes for complex financial interfaces including ISO 20022 payment flows, reconciliation workflows, and cross-border payment panels, maintaining rigorous attention to detail across **15+ interconnected enterprise systems**.
- Collaborated with banking operations teams and business stakeholders to provide high-quality, actionable feedback on system interface design and user-interaction patterns, directly informing **8 post-implementation system improvements** and UAT coordination cycles.
- Communicated insights and findings across asynchronous, globally distributed teams through detailed written documentation, Confluence knowledge bases, and verbal debriefs, ensuring consistent application of quality standards and guidelines across **40+ team members**.
- Demonstrated exceptional computer literacy and high prioritization discipline in a remote work environment, managing time across multiple concurrent annotation workstreams, meeting **100% of deadline commitments** while maintaining production-support incident response SLAs.

SKILLS

Data Review & Annotation – screenshot analysis, UI element identification, workflow interpretation, evidence-based assessment, structured annotation, quality assurance.

Technical Domain Knowledge – admin panels, CRM tools, web applications, dashboards, forms, payment-operations systems, SWIFT messaging (MT/MX), ISO 20022 message flows, financial workflows.

Operations & Support – production support, incident response, SLA management, change-control management, UAT coordination, post-implementation triage, cross-functional collaboration.

Communication & Documentation – written communication, technical writing, clear reasoning articulation, knowledge-sharing, Confluence documentation, stakeholder reporting.

Software & Tools – Splunk, Dynatrace, CloudWatch, Power BI, Tableau, Jira, Git, Jenkins, SQL (PostgreSQL, MySQL, Oracle), Java Spring Boot.

Domain Expertise – banking and financial services, payments processing, SEPA flows, cross-border payments, PSD2 regulations, GDPR compliance, ERP systems, business-intelligence dashboards.

Remote Collaboration – asynchronous team communication, distributed workstream management, remote deadline adherence, global team coordination.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

AI Training Data Quality Pipeline for Financial Dashboard Annotation (HCL Technologies)

- Designed and executed a **structured data annotation workflow** capturing screenshots from SWIFT messaging dashboards, payment reconciliation systems, and cross-border payment interfaces, annotating **3,200+ UI interactions** with pixel-level precision and functional intent documentation to train AI models for financial-domain interface recognition.
- Established a rigorous **evidence-based assessment framework** for evaluating AI model responses against observable dashboard elements, ISO 20022 message formats, and payment-flow workflows, reducing annotation ambiguity by **45%** and achieving **96.8% inter-annotator agreement** across 8 banking-domain reviewers.
- Built **quality-control checkpoints** within the annotation pipeline using Jira ticketing and Confluence documentation standards, implementing **3-tier review gates** that caught and corrected **340+ labeling inconsistencies** before model ingestion, ensuring training-data integrity across payment-operations and admin-panel categories.
- Collaborated with banking operations teams and AI platform engineers to define **UI element taxonomies** specific to payments processing (transaction status indicators, reconciliation alerts, cross-border routing panels), reducing AI model training time by **22%** and improving downstream classification accuracy to **94.1%**.
- Documented all assessment methodologies, edge cases, and evidence-reasoning patterns in **asynchronous written reports** delivered to globally distributed stakeholder groups, enabling **12 junior annotators** to independently achieve **95%+ accuracy** within 3 weeks of onboarding.

Banking Dashboard UI Interpretation & Regulatory Compliance Verification (HCL Technologies)

- Analyzed **screenshot data from SEPA payments dashboards and GDPR-compliant audit-trail interfaces**, identifying UI patterns that signaled regulatory adherence and transaction-flow visibility, providing feedback that informed **6 compliance-driven UI redesigns** across payment-operations systems.
- Distinguished between observable dashboard evidence (visible transaction fields, reconciliation status indicators) and assumptions about backend processes, producing **140+ detailed annotation reports** with clear reasoning chains that directly improved AI model precision in identifying payment-state transitions.
- Maintained **100% consistency** with established annotation guidelines across **180+ hours** of concurrent remote annotation work, adhering to quality standards while managing competing deadline priorities across payment-dashboard, ERP-system, and CRM-interface review tasks.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
