PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, deployed, and managed **AWS infrastructure** supporting enterprise Java/.NET applications across **EC2, S3, RDS, and CloudWatch**, achieving **99.5% uptime SLA** through proactive monitoring and **P1/P2 incident response** protocols.
- Automated infrastructure provisioning and operational workflows using **Python** and **Bash shell scripting**, reducing manual deployment time by **40%** and enabling self-service infrastructure deployment for cross-functional teams.
- Implemented and maintained **IAM, VPC, and network configurations** across production environments, enforcing least-privilege access controls and **cloud security best practices** aligned with regulatory compliance (GDPR, audit-trail requirements) and financial-services standards.
- Monitored system performance, troubleshoot infrastructure issues, and optimized **AWS CloudWatch** dashboards with custom metrics and alarms; analyzed logs via **Splunk** and **Dynatrace** to drive capacity planning and resilience improvements.
- Collaborated with cross-functional teams—banking-domain business analysts, operations, and UAT coordinators—to deliver **scalable, reliable, and resilient cloud solutions** supporting payments operations, SEPA flows, and enterprise system integrations.
- Implemented **CI/CD pipelines** using **Jenkins, Git, and Docker** containerization; enforced code-review discipline and change-control processes across interconnected systems, reducing production incidents by **35%** and improving deployment frequency to multiple releases per week.

SKILLS

AWS Core Services – EC2, S3, RDS, IAM, VPC, CloudWatch, Lambda.

Infrastructure as Code – Terraform, CloudFormation, Docker.

Scripting & Automation – Python, Bash, shell scripting, cron jobs.

Linux Administration – log analysis, system configuration, performance tuning.

Cloud Security & Compliance – IAM policies, network security, GDPR, regulatory best practices, audit trails.

Monitoring & Troubleshooting – CloudWatch, Splunk, Dynatrace, performance optimization.

CI/CD & Collaboration – Jenkins, Git, Jira, code reviews, Agile/Scrum.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

AWS Infrastructure & Production Support – Banking Payments Dashboard (HCL Technologies)

- Architected and maintained **highly available, fault-tolerant AWS infrastructure** (EC2 auto-scaling, RDS multi-AZ, CloudWatch alarms) supporting a mission-critical SWIFT messaging and payments-operations dashboard serving a tier-1 banking customer.
- Designed and enforced **IAM roles, VPC network segmentation, and security group policies** to isolate payments-processing environments, meet PSD2 and GDPR compliance mandates, and ensure audit-trail integrity across cross-border SEPA and ISO 20022 message flows.
- Developed **Python automation scripts and Bash utilities** to orchestrate routine infrastructure tasks—database backups, log rotation, performance metric aggregation—reducing operational overhead by **30%** and enabling 24/7 on-call support with predictable runbooks.

Cloud Infrastructure Automation & CI/CD Pipeline Deployment (HCL Technologies)

- Implemented end-to-end **Infrastructure as Code** patterns using **Terraform and CloudFormation** to provision and manage **EC2 instances, RDS databases, S3 buckets, and VPC configurations** across development, staging, and production environments, enabling infrastructure repeatability and disaster-recovery drills.
- Built robust **Jenkins CI/CD pipelines** integrated with **Git branching strategies, Docker containerization, and automated testing gates**; reduced deployment failures by **45%** through infrastructure validation and blue-green deployment patterns on **EC2**.
- Established comprehensive **CloudWatch monitoring dashboards** with custom metrics, log-aggregation rules, and automated alerting; correlated **AWS CloudWatch, Splunk, and Dynatrace** signals to identify root causes of latency spikes, reducing mean-time-to-resolution (MTTR) by **50%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
