

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented scalable ELT pipelines using **Python** and **SQL** to ingest and transform large volumes of structured and unstructured data, supporting critical billing operations.
- Architected and maintained data integrations across diverse sources including **databases** and **APIs**, ensuring seamless data flow into the core consumption platform.
- Championed data integrity by implementing rigorous data validation checks and adhering to financial data regulations, including **SOX compliance** for sensitive billing information.
- Proactively monitored **Snowflake** data warehouse performance, identified and resolved bottlenecks, and optimized query execution, improving data processing speed by **~18%**.
- Collaborated with **data scientists** and **business analysts** to capture requirements for new data models and curated datasets, directly impacting the delivery of timely usage billing.
- Developed and optimized complex **SQL** queries and stored procedures within **SQL Server** for data transformation and reporting, reducing report generation times by an average of **22%**.
- Containerized data pipeline components using **Docker** and deployed them to a scalable cloud environment, enhancing deployment efficiency and system reliability.

SKILLS

Data Engineering – ELT, ETL, Data Warehousing, Data Modeling, Data Governance, SOX Compliance

Cloud Platforms – Snowflake, AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Python, SQL

Databases – SQL Server, PostgreSQL, MySQL, Oracle

Tools & Frameworks – dbt, Fivetran, Docker, Jenkins, Git, Jira

Data Integration – APIs, Database Integrations, Business Application Software Integration

PROJECTS

Consumption Data Pipeline Optimization (HCL Technologies)

- Engineered and optimized ELT pipelines using **Python** and **SQL** to ingest and transform high-volume consumption data, processing approximately **1.5 million records** daily.
- Implemented strategic indexing and query refactoring in **PostgreSQL**, reducing data processing latency by **30%** for critical billing reports.
- Collaborated with financial operations teams to define data quality metrics and implement automated validation checks, ensuring upstream data accuracy for downstream analytics.

Usage Billing Data Platform (HCL Technologies)

- Developed **SQL Server** stored procedures and Python scripts to support a usage billing data platform, integrating data from multiple enterprise systems.
- Built data transformation logic to aggregate and reconcile usage metrics, contributing to the accuracy of monthly billing cycles for enterprise customers.
- Managed CI/CD integration using **Jenkins** for pipeline deployments, ensuring consistent and reliable delivery of data processing jobs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
