PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Python** microservices using **Flask**, handling approximately **1,500 requests per second** during peak loads and integrating with third-party APIs.
- Optimized backend **Python** application performance by implementing caching strategies and refactoring database queries, reducing average response times by **30%**.
- Wrote **clean, maintainable Python** code and conducted peer code reviews, ensuring adherence to established best practices and improving overall code quality.
- Integrated third-party **RESTful APIs** for payment processing and data enrichment, expanding application functionality and enhancing user experience.
- Managed and troubleshooted technical issues in production environments, including debugging complex **Python** code and performance tuning for critical services.
- Collaborated with cross-functional teams using **Agile methodologies** to define requirements, estimate tasks, and deliver high-quality software solutions within sprint cycles.
- Containerized **Python** applications using **Docker** and deployed them to **AWS EC2** instances, streamlining the deployment process and improving environment consistency.

SKILLS

Languages – Python, SQL, Java

Web Frameworks – Flask, Django, Spring Boot

Databases – PostgreSQL, MySQL, MongoDB

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Tools & Technologies – RESTful API development, Git, Docker, Jenkins, Jira, Confluence, Linux, Splunk, Dynatrace, pandas, NumPy

PROJECTS

Scalable API for Transaction Processing

- Designed and built a **Python Flask** API to manage financial transaction data, supporting approximately **2,000 transactions per minute**.
- Integrated with a **PostgreSQL** database for data persistence and retrieval, optimizing queries for efficient data access.
- Implemented rate limiting and input validation to ensure the security and reliability of the API endpoints.

Automated Data Pipeline for Reporting

- Developed a **Python**-based ETL pipeline using **pandas** to extract, transform, and load data from multiple sources into a data warehouse.
- Automated the generation of weekly operational reports, reducing manual effort by **15 hours per week**.
- Scheduled pipeline execution using cron jobs on **Linux**, ensuring timely data availability for business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
