+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained production-grade **Java Spring Boot** microservices, focusing on implementing robust RESTful APIs for internal and external system integrations.
- Designed and implemented persistence layers using **Hibernate** and **JPA**, ensuring efficient data management and retrieval for enterprise applications.
- Wrote comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over **85%** code coverage for critical application modules.
- Managed incident response for P1 and P2 issues on enterprise applications, performing root cause analysis and implementing timely fixes to meet strict SLAs.
- Automated recurring reporting tasks using **Python** scripting and **pandas**, reducing manual effort by approximately **20 hours** per month for the operations team.
- Configured and managed CI/CD pipelines using **Jenkins** and **Git**, streamlining the build, test, and deployment process for new feature releases.
- Containerized microservices using **Docker** and deployed them to **AWS EC2** instances, enabling consistent environments across development and production.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, Microservices, JUnit, Mockito, Maven, Git

Data Engineering & Scripting – Python, pandas, SQL, PostgreSQL, MySQL, Oracle, ETL, Data Pipelines

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, CI/CD, Linux Shell Scripting

Monitoring & Support – Splunk, Dynatrace, Incident Management, SLA Management, Production Support

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, scikit-learn, Data Modelling

PROJECTS

Enterprise Java Payments Dashboard Service

- Engineered a **Java Spring Boot** backend service to process and monitor transaction data for a financial services operations dashboard.
- Implemented data persistence using **JPA** and **PostgreSQL**, handling approximately **5,000** daily transaction records and supporting reconciliation workflows.
- Developed RESTful APIs to expose transaction status and alert data to the front-end dashboard, integrating with existing operational monitoring tools.

Automated Data Ingestion Pipeline

- Developed a **Python**-based ETL pipeline to ingest and transform data from multiple enterprise systems, including ERP modules and operational platforms.
- Utilized **pandas** for data manipulation and cleaning, preparing datasets for downstream reporting and analysis, processing roughly **1 TB** of historical data.
- Scheduled and managed pipeline execution using cron jobs on Linux, ensuring reliable data delivery for daily business intelligence reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
