## PROFESSIONAL EXPERIENCE — 3.5 YEARS

---

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed scalable backend services and RESTful APIs using **Python** and **Django** for a partner company focused on genomic analysis.
- Enhanced and supported core web platforms, ensuring high performance and reliability for researcher and healthcare professional users.
- Collaborated with product managers and domain experts to deliver end-to-end features, translating research requirements into functional software.
- Built and optimized **RESTful APIs** using **Django REST Framework** to facilitate seamless communication between frontend applications and backend systems.
- Contributed to code reviews, unit testing, and integration testing to maintain high code quality and adhere to software engineering best practices.
- Participated in architecture discussions and performance optimization initiatives, focusing on scalable and maintainable backend solutions.
- Managed deployment processes and provided operational support for backend services, including shared on-call responsibilities.

## SKILLS

---

**Languages** – Python, English

**Frameworks/Libraries** – Django, Django REST Framework, scikit-learn, pandas, NumPy

**Databases** – MariaDB, PostgreSQL, MySQL, Oracle

**Cloud/DevOps** – AWS, Docker, Jenkins, Git, Ansible

**Tools/Methodologies** – REST APIs, Agile, Scrum, Jira, Confluence, Linux

## PROJECTS

---

### Genomic Data Analysis Backend Service (HCL Technologies)

- Developed a **Python** backend service using **Django** to process and analyze large genomic datasets, supporting precision healthcare technologies.
- Designed and implemented **RESTful APIs** for researchers to access and query processed data, integrating with existing data warehousing solutions.
- Wrote unit and integration tests to ensure the reliability of data processing pipelines and API endpoints, achieving over 90% test coverage.

### Healthcare Technology API Integration (HCL Technologies)

- Built a **Python**-based integration layer using **Flask** to connect legacy healthcare systems with a new precision medicine platform.
- Managed data transformation and validation for patient records exchanged between systems, ensuring data integrity and compliance with healthcare standards.
- Assisted in the deployment of the integration service to an **AWS** environment, configuring EC2 instances and security groups.

## EDUCATION

---

**M.Sc. Data Analytics — National College of Ireland, Dublin**

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India**

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
