## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Administered warranty claims within the **Tavant Warranty Management System**, ensuring precise data entry and processing for approximately **150 claims weekly**.
- Reviewed and assessed warranty claims against policy guidelines, confirming completeness and accuracy of failure modes to assign responsibility and approve or deny claims.
- Developed comprehensive **warranty reports and channel metrics** to identify process improvement opportunities and potential areas of abuse or negligence, supporting corrective actions.
- Coordinated with internal teams including Global Warranty, Quality, and Engineering to support consistent processes and defect cost liability decisions.
- Provided technical assessment and reporting on field failures, communicating claim adjustments or denials clearly and promptly to customers and channel partners.
- Managed multiple priorities and met service-level agreements for claim processing, contributing to projects aimed at improving warranty processes and customer outcomes.
- Supported relevant aftermarket programs such as **SelectCARE**, coordinating warranty-system changes, user acceptance testing, and third-party vendor support tickets.

## SKILLS

**Warranty Management** – Tavant Warranty Management System, Claim Processing, Policy Review, Technical Assessment, Reporting, Channel Metrics, Process Improvement

**Technical Skills** – Microsoft Office Suite, Data Analysis, Structured Problem-Solving, Analytical Thinking

**Communication & Collaboration** – Written and Verbal Communication, Customer Focus, Cross-functional Collaboration, Training, Stakeholder Management

**Project Management** – Managing Multiple Priorities, Meeting SLAs, User Acceptance Testing, Vendor Support Tickets

**Domain Knowledge** – Industrial Equipment, Product Technical Support, Quality Assurance, Lean Principles

## PROJECTS

### Warranty Claim Analysis and Reporting Tool

- Developed a Python-based tool to automate the aggregation and analysis of warranty claim data, processing over **5,000 historical claims** to identify trends.
- Created interactive dashboards using **Power BI** to visualize key warranty metrics, including failure modes, processing times, and denial rates for management review.
- Implemented data validation checks in Python to ensure accuracy and completeness of claim information before ingestion into the reporting system.

### Product Failure Mode Root Cause Analysis

- Analyzed field failure reports and technical documentation for industrial equipment to perform root cause analysis on recurring issues.
- Collaborated with the Quality Assurance team to document findings and recommend design or manufacturing adjustments, contributing to a **15% reduction** in specific component failures.
- Authored technical assessment reports detailing failure modes and proposed solutions for review by engineering and product management teams.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
