HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Configured and maintained **Prometheus** and **Grafana** for real-time monitoring of critical production services, reducing alert noise by **40%** through refined query tuning.
- Designed and implemented **Python** scripts to automate routine infrastructure tasks, including log aggregation pipeline health checks and configuration drift detection, saving approximately **10 hours** of manual effort per week.
- Provided Tier 3 production support for enterprise applications, diagnosing and resolving P1/P2 incidents within strict SLAs using **Splunk** and **Dynatrace** for log analysis and performance monitoring.
- Deployed and managed observability components, including **Zabbix** agents and **Graylog** log forwarders, within **Linux** server environments and containerized deployments.
- Contributed to the integration of monitoring data with ITSM tools, ensuring seamless ticket creation and updates for incident and change management processes.
- Automated the deployment and configuration of monitoring stacks using **Ansible** playbooks, standardizing setups across a fleet of over **200 servers** and improving deployment consistency.
- Participated in post-incident reviews, documenting root causes and recommending system enhancements to prevent recurrence, adhering to **ITIL** best practices.

SKILLS

Monitoring & Observability – Prometheus, Grafana, Zabbix, Operations Bridge Manager (OBM), Network Node Manager (NNMi), Graylog, New Relic, Dynatrace

Cloud & Containerization – Linux, Kubernetes, Docker, AWS (EC2, S3, Lambda, CloudWatch)

Automation & IaC – Python, Bash, Ansible, Terraform, CI/CD Pipelines, GitLab

ITSM & Methodologies – ITIL, Incident Management, Problem Management, Change Management, Configuration Management

Scripting & APIs – Bash, Python, APIs, Syslog, SNMP

Databases & Storage – PostgreSQL, MySQL, Oracle, S3

PROJECTS

Automated Monitoring Stack Deployment (HCL Technologies)

- Developed **Ansible** playbooks to automate the installation and configuration of **Zabbix** agents and **Graylog** collectors across a distributed Linux environment, reducing manual setup time by **75%**.
- Integrated custom Python scripts with the monitoring stack to perform automated health checks on log pipelines and notify operations teams of anomalies, targeting a **99.5%** pipeline availability.
- Established standardized monitoring templates for new application deployments, ensuring consistent observability coverage and faster incident detection.

Real-time Application Performance Dashboard

- Built an interactive dashboard using **Grafana** to visualize key performance indicators (KPIs) and system health metrics from **Prometheus** for a critical enterprise application.
- Configured alerting rules within **Prometheus** based on defined SLIs, ensuring timely notifications for over **50** distinct alert conditions.
- Collaborated with development teams to instrument applications with appropriate metrics, enhancing visibility into application behavior and user experience.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
