PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed AI agents that integrated with enterprise customer systems and APIs, translating complex operational challenges into actionable technical designs and production-ready code.
- Owned the end-to-end deployment lifecycle for AI agent solutions, ensuring reliability, performance optimization, and continuous iteration based on real-world data testing and outcome measurement.
- Collaborated directly with customer engineering teams during onboarding to define success criteria and gather requirements for AI agent integrations, facilitating a smooth transition from concept to production.
- Contributed to the platform's scalability by enhancing delivery practices and developing new tools and documentation for customer success, reducing average time-to-production for AI agents.
- Built and maintained production-quality Python scripts for data pipeline automation and ETL processes, supporting the ingestion and transformation of diverse datasets for AI model training and operational reporting.
- Designed and implemented REST APIs using Java Spring Boot to facilitate cross-service data exchange and integration with customer-facing applications, incorporating robust error handling and validation patterns.
- Containerized microservices using Docker and orchestrated deployments on AWS EC2 instances, managing CI/CD pipelines with Jenkins for automated builds, testing, and deployments.

SKILLS

AI/ML – AI agents, Machine Learning, Agentic AI, Production AI systems, Data Engineering

Programming Languages – Python, Java, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, CI/CD

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Agile, Scrum, Jira, Confluence, Git, Linux Shell Scripting

PROJECTS

Customer AI Agent Integration Platform

- Developed a Python-based integration framework to connect enterprise customer systems with AI agents, enabling data ingestion from diverse sources like APIs and databases.
- Built reusable Python components for common integration patterns, reducing boilerplate code for new customer deployments and accelerating time-to-value for AI agent solutions.
- Authored comprehensive technical documentation and provided direct support to customer engineering teams during the integration process, ensuring successful adoption and troubleshooting.

Production AI Agent Deployment & Monitoring

- Engineered a CI/CD pipeline using Jenkins and Docker to automate the build, testing, and deployment of AI agent microservices to AWS environments.
- Implemented real-time monitoring and logging for deployed AI agents using AWS CloudWatch and Splunk, enabling rapid identification and resolution of production issues and performance bottlenecks.
- Designed and implemented basic A/B testing frameworks for AI agent iterations, measuring performance impact on key customer success criteria.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
