# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Engineered **Terraform** modules to provision and manage cloud infrastructure on **Azure**, automating the deployment of Kubernetes clusters and associated networking components.
- Developed and maintained **CI/CD pipelines** using **ArgoCD** and **GitHub Actions**, enabling automated application deployments to Kubernetes environments with zero-touch rollouts.
- Instrumented platform services with **Prometheus** and **Grafana** for comprehensive monitoring, establishing dashboards that provided visibility into application health and resource utilization across **Kubernetes**.
- Contributed to the development of the internal developer platform by writing **Kubernetes manifests** for service deployments, adhering to established team standards and best practices.
- Participated in the platform's **on-call rotation**, shadowing senior engineers to gain experience in incident response and support for critical platform services.
- Collaborated with product engineering teams to understand their platform needs, gathering requirements for new features and improvements to the developer experience.
- Wrote **infrastructure-as-code** components using **Terraform** to manage cloud resources, incorporating feedback from code reviews to ensure adherence to platform patterns.

## SKILLS

**Cloud Platforms** – Azure, AWS, OpenShift

**Container Orchestration** – Kubernetes, OpenShift

**Infrastructure as Code** – Terraform

**CI/CD & Delivery** – ArgoCD, GitHub Actions, Jenkins

**Observability** – Prometheus, Grafana, Datadog

**Programming & Scripting** – Python, Bash

**Core Concepts** – Linux, Networking, Service Mesh

## PROJECTS

### Cloud-Native CI/CD Platform Automation

- Automated the provisioning of **Kubernetes** clusters on **Azure** using **Terraform**, reducing deployment time for new environments by 40%.
- Implemented end-to-end **CI/CD pipelines** with **ArgoCD**, enabling automated testing and deployment of microservices to production clusters.
- Configured **Prometheus** and **Grafana** for observability, creating dashboards to monitor cluster health and application performance metrics.

### Kubernetes Manifest Management and Templating

- Developed a standardized set of **Kubernetes manifests** using Helm charts for common application patterns, simplifying deployments for internal teams.
- Integrated **Bash scripting** with the manifest generation process to automate configuration variable substitution, reducing manual errors by approximately 65%.
- Wrote comprehensive documentation and provided training sessions to engineering teams on using the templated Kubernetes resources.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
