HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **NestJS** backend services with **TypeScript**, implementing RESTful APIs for AI agent orchestration and data processing, handling approximately **500 requests per minute**.
- Integrated **AI agents** with enterprise systems by building secure data connectors and API gateways, enabling agents to interact with customer databases and internal tools.
- Shipped full-stack features for the customer-facing product surface, working across the **React** frontend and **NestJS** backend to deliver user-facing agent control panels.
- Collaborated directly with **founders and customers** to gather requirements, define agent workflows, and iterate on product features based on real-world usage and feedback.
- Implemented **PostgreSQL** database schemas and optimized queries for agent state management and historical data logging, supporting a data volume of **~50 GB** per active agent.
- Containerized backend services using **Docker** and deployed them to an **AWS** environment, ensuring reliable and scalable operation for AI agent execution.
- Participated in **Agile ceremonies**, including sprint planning and daily stand-ups, to manage project priorities and ensure timely delivery of features in a fast-moving startup environment.

SKILLS

Frontend – React, Next.js, TypeScript, HTML5, CSS3

Backend – Node.js, NestJS, TypeScript, REST APIs

Databases – PostgreSQL

Cloud & DevOps – AWS, Docker, Kubernetes

AI/ML – AI Agents, Autonomous Agents, Workflow Automation

Methodologies – Agile, Scrum

PROJECTS

AI Agent Integration for Enterprise Systems

- Developed a **TypeScript**-based microservice using **NestJS** to manage the lifecycle and execution of autonomous AI agents, processing over **2,000 commands daily**.
- Built secure API endpoints and data transformers to integrate agents with disparate enterprise systems, including CRM and ERP platforms, ensuring data consistency.
- Containerized the agent orchestration service with **Docker** for deployment on **AWS**, improving deployment speed by **30%**.

Customer-Facing Agent Control Panel

- Designed and implemented a **React**-based frontend dashboard for customers to monitor and configure AI agents, displaying real-time status and historical performance metrics.
- Integrated the frontend with the backend **NestJS** APIs, enabling users to initiate, pause, and review agent actions, reducing manual oversight by an estimated **20%**.
- Managed application state using **TypeScript** and implemented interactive data visualizations for agent activity logs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
