PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot microservices** for real-time public transport operations, focusing on Automated Vehicle Location (AVL) systems.
- Implemented new functionality and enhanced existing software solutions by translating business and technical requirements into **robust software designs** using Java.
- Developed and maintained high-quality Java backend applications, ensuring all code met quality standards through **unit testing** and peer review practices.
- Collaborated with Agile development teams in sprint planning, estimation, and delivery activities, contributing to the continuous improvement of software development processes.
- Supported troubleshooting, bug fixing, and performance optimisation activities for mission-critical transport management platforms, analysing logs from **Grafana** and **Loki**.
- Contributed to international projects by working closely with development and project teams in Germany, delivering innovative software solutions for public transport providers.
- Containerised Java backend applications using **Docker** and deployed them to a **Kubernetes** cluster, managing configurations and ensuring seamless integration.

SKILLS

Languages – Java, SQL, English

Frameworks & Libraries – Spring Boot, Hibernate, Spring Data, JUnit, WireMock

Databases – PostgreSQL, Oracle, MySQL, DB2, MongoDB

Tools & Technologies – Docker, Kubernetes, Maven, Jenkins, Git, Grafana, Loki

Methodologies – Agile, Scrum, Microservices, RESTful APIs

Cloud Platforms – AWS

PROJECTS

Real-Time Transit Data Aggregator (HCL Technologies)

- Developed a **Java Spring Boot** application to aggregate real-time transit data feeds, including Automated Vehicle Location (AVL) information.
- Integrated with **PostgreSQL** to store and query processed transit data, supporting operational monitoring and reporting requirements.
- Implemented RESTful APIs for data retrieval, enabling downstream consumption by other internal systems and analytics platforms.

Intermodal Transport Control System Enhancements (HCL Technologies)

- Enhanced existing **Java** backend services for an Intermodal Transport Control System (ITCS), focusing on improving data processing efficiency.
- Refactored database interactions using **Hibernate** and Spring Data to optimise query performance for large datasets, reducing average response times by approximately **18%**.
- Participated in code reviews and applied object-oriented design principles to ensure code quality and maintainability within the existing system architecture.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
