HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production support for enterprise applications on **AWS** using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring SLA adherence for core financial services.
- Automated routine data extraction and reporting tasks using **Python** scripting, reducing manual effort by approximately **15 hours per week** across the operations team.
- Developed and maintained **Java Spring Boot** REST APIs to support cross-system integrations, processing an average of **~2,800 requests per day**.
- Oversaw the peer review and verification of **geotechnical data** and design calculations, ensuring adherence to UK ground conditions standards and best practices.
- Provided consultative advice to external partners on site-selection and optioneering for infrastructure projects, contributing to the early stages of project lifecycles.
- Effectively managed geotechnical projects, developing schedules and coordinating resources to meet client objectives and budget constraints, including a **£1.2M** water utility scheme.
- Containerised several microservices using **Docker** and deployed them to an **AWS EC2** environment, improving deployment consistency and reducing setup time by **40%**.

SKILLS

Geotechnical Engineering – Geotechnical Data Analysis, Geotechnical Design, Ground Investigation, Soil Mechanics, Engineering Geology

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Java, Python, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Docker, Jenkins, Git, Jira, Agile, Splunk, Dynatrace

PROJECTS

Infrastructure Geotechnical Analysis Platform

- Developed a Python-based analysis tool to process and interpret raw geotechnical data from site investigations, supporting teams working on national infrastructure projects.
- Implemented data validation routines in **Python** to ensure the accuracy of input parameters for **geotechnical calculations**, catching over **60%** of common data entry errors.
- Designed and documented the system architecture for a cloud-hosted data processing pipeline, enabling scalable analysis of large geological datasets on **AWS**.

Enterprise Application Observability Enhancement

- Enhanced production monitoring for a suite of enterprise applications by integrating **Splunk** and **Dynatrace**, providing real-time insights into system performance and user experience.
- Automated the generation of weekly operational performance reports using **Python** and SQL queries against application logs, consolidating data from multiple sources into actionable summaries.
- Collaborated with operations teams to define key performance indicators (KPIs) and alerts for critical financial transactions, improving incident detection time by an estimated **25%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
