HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs for enterprise applications, handling over **5,000 requests per day** and supporting core business logic.
- Designed and implemented database schemas and wrote complex SQL queries across **PostgreSQL** and **Oracle** for data extraction and validation, supporting critical reporting functions.
- Automated data processing and ETL workflows using **Python scripting** and libraries like pandas, reducing manual effort by approximately **30%** for scheduled reporting tasks.
- Gained exposure to **Teradata** through involvement in projects related to financial data development and management within the organization's systems.
- Contributed to data analysis and cleansing activities, ensuring data integrity for financial reporting and operational insights.
- Documented technical specifications for data development requirements, translating business needs into actionable technical plans for the finance data team.
- Monitored data visualization batch processes using **Splunk** and implemented fixes for identified issues, ensuring timely delivery of financial reports.

SKILLS

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Visualisation, Statistical Analysis, A/B Testing, Machine Learning Fundamentals

Programming & Scripting – Python, Java, SQL, R, pandas, NumPy, scikit-learn, Spring Boot, Flask, FastAPI

Databases & Warehousing – PostgreSQL, MySQL, Oracle, Teradata, Data Warehousing

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux Shell Scripting

Financial Operations – Financial Data Analysis, Data Cleansing, Technical Specifications, Financial Information Management Reports, Transaction Monitoring Workflows

PROJECTS

Financial Transaction Data Analysis Platform

- Developed Python scripts to ingest and cleanse large datasets of financial transactions, preparing them for analysis and reporting, handling approximately **1.5 million records** per dataset.
- Built interactive **Power BI dashboards** to visualize key financial metrics and trends for business stakeholders, enabling faster decision-making.
- Applied statistical methods and **SQL** to perform exploratory data analysis, identifying patterns and anomalies within transaction data.

Automated Financial Reporting Service

- Created automated **Python** data pipelines using **pandas** to extract, transform, and load financial data from various sources into a central repository.
- Implemented data validation checks and error handling within the ETL process, reducing data discrepancies by **20%** and ensuring report accuracy.
- Scheduled and monitored report generation using Linux cron jobs, providing daily operational insights to the finance operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
