HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for financial transaction processing, handling approximately **1,500 requests per minute**.
- Designed and implemented **Hibernate** mappings and JPA entities for a core banking ledger system, ensuring data integrity across **multiple transaction types**.
- Authored **JUnit** and **Mockito** test suites for critical Java microservices, achieving over **90% code coverage** for new feature development.
- Challenged credit risk models by applying **statistical techniques** and data analytics to review their appropriateness and compliance with **European Banking Regulatory Guidelines**.
- Collaborated with business units to deliver a best-in-class **analytics service**, translating complex data insights into actionable recommendations for model enhancement.
- Contributed to the constant improvement of model validation standards and methodologies, ensuring alignment with **internal policies** and external regulatory requirements.
- Containerized microservices using **Docker** and managed deployments on **AWS EC2 instances**, enabling scalable and resilient application infrastructure.

SKILLS

Programming Languages – Java, Python, SQL, R, DAX

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Analytics & BI – Power BI, Tableau, RStudio, Data Modelling, ETL, Data Warehousing

Domain Knowledge – Credit Risk Models, IFRS9 ECL, Economic Capital, Stress Testing, Regulatory Compliance (CRR, EBA Guidelines), Financial Services Operations

PROJECTS

Credit Risk Model Validation Framework (HCL Technologies)

- Developed Python scripts to automate the extraction and pre-processing of large datasets (**~500GB**) from relational databases for model input.
- Applied statistical analysis and hypothesis testing using **R** to challenge model assumptions and validate predictive power against historical data.
- Built interactive **Power BI dashboards** to visualize model performance metrics and key risk indicators for stakeholders, facilitating review meetings.

Automated Transaction Reconciliation Service (HCL Technologies)

- Engineered a **Java Spring Boot** service to process and reconcile high-volume financial transaction messages, identifying discrepancies and generating alerts.
- Implemented robust error handling and logging mechanisms using **Splunk**, reducing manual investigation time for reconciliation failures by **~40%**.
- Designed and implemented RESTful APIs for integrating the reconciliation service with upstream and downstream financial systems, ensuring seamless data flow.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
