# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Managed the end-to-end resolution of **P1 and P2 incidents** for critical enterprise applications, coordinating response efforts across multiple engineering teams and ensuring adherence to strict SLAs.
- Developed and maintained **Python scripts** for automating data ingestion, ETL processes, and scheduled reporting, reducing manual effort by approximately 40% for the operations team.
- Executed ad-hoc **SQL queries** against PostgreSQL, MySQL, and Oracle databases for data validation, troubleshooting, and ad-hoc reporting needs, supporting approximately 15-20 requests per week.
- Designed and implemented **Java Spring Boot REST APIs** to facilitate cross-service data exchange, including robust error handling and request validation mechanisms.
- Participated in daily **Scrum ceremonies**, including sprint planning and backlog grooming, contributing to technical estimations and ensuring timely delivery of features and bug fixes.
- Conducted **real-time proactive monitoring** of customer workloads using AWS services like CloudWatch and Splunk, identifying and alerting on critical alarms within minutes to minimize potential disruption.
- Collaborated with internal stakeholders to improve the customer experience by identifying and troubleshooting recurring platform issues, owning projects to drive targeted improvements in system stability.

## SKILLS

**Cloud Platforms** – AWS (EC2, S3, Lambda, CloudWatch)

**Programming Languages** – Java, Python, SQL, R

**Frameworks & Libraries** – Spring Boot, pandas, NumPy, scikit-learn

**Databases** – PostgreSQL, MySQL, Oracle

**DevOps & CI/CD** – Docker, Jenkins, Git

**Monitoring & Observability** – Splunk, Dynatrace, CloudWatch

**BI & Data Analytics** – Power BI, Tableau, DAX, Power Query

## PROJECTS

### Enterprise Application Incident Response Framework

- Developed a comprehensive incident response playbook for critical enterprise applications, standardizing triage and escalation procedures for P1 and P2 incidents.
- Implemented automated health checks and alerting mechanisms using **Splunk and AWS CloudWatch**, reducing average detection time for critical issues by 30%.
- Created **Java-based automation scripts** to gather diagnostic data during incidents, streamlining the root cause analysis process for a team of 8 engineers.

### Automated Financial Transaction Monitoring System

- Engineered a **Python-based ETL pipeline** to process and validate transaction data streams from multiple sources, feeding into an operational dashboard.
- Designed and implemented **SQL procedures and indexing strategies** on PostgreSQL to optimize query performance for transaction reconciliation workflows, cutting report generation time by 22%.
- Built interactive **Power BI dashboards** to visualize transaction monitoring metrics and alert stakeholders on anomalies, supporting data-driven operational decisions.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
