PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed P1/P2 incidents for enterprise Java and .NET applications, ensuring adherence to SLAs and coordinating cross-functional response teams using **Splunk** and **Dynatrace**.
- Developed Python scripts to automate daily reporting tasks and build ETL pipelines for data ingestion, processing approximately **1.5 TB** of operational data weekly.
- Executed complex SQL queries across **PostgreSQL** and **Oracle** databases for data validation, ad-hoc analysis, and supporting schema evolution for financial services platforms.
- Contributed to the development of a payments operations dashboard by implementing new features and resolving bugs in **Java Spring Boot** microservices, enhancing transaction monitoring capabilities.
- Designed and led incident response calls for critical customer-impacting events, facilitating communication between internal engineering teams and external enterprise clients.
- Developed and maintained runbooks and standard operating procedures for incident detection and response, improving team's mean time to resolution by **15%**.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, managing configurations via **Jenkins** pipelines for continuous integration and deployment.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Java, Python, SQL, R, TypeScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

DevOps & CI/CD – Docker, Jenkins, Git, Linux Shell Scripting

Business Intelligence – Power BI, Tableau, DAX, Power Query

PROJECTS

Enterprise Application Support & Automation Suite

- Engineered Python scripts to automate data extraction and transformation from diverse sources, reducing manual processing time for operational reports by **40%**.
- Developed a monitoring dashboard using **Power BI** that aggregated alerts from **Splunk** and **Dynatrace**, providing a unified view of system health for 12 critical enterprise applications.
- Supported production environments for a financial services client, acting as a primary point of contact for P1 incidents and coordinating resolution efforts across multiple teams.

Incident Response & Runbook Automation

- Created detailed incident response runbooks for common failure scenarios in a cloud-native payments operations dashboard, reducing average incident response time by **20%**.
- Collaborated with customer operations teams to gather requirements for real-time transaction monitoring alerts, implementing custom logic in **Java Spring Boot** to flag exceptions.
- Participated in cross-functional team meetings to review incident post-mortems and identify systemic issues, contributing to a backlog of **30+** improvement tasks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
