PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided critical on-shift network operations support for large-scale events, diagnosing and responding to incidents impacting AWS infrastructure services.
- Supported and maintained next-generation networks, ensuring high availability and performance for AWS customers.
- Developed simple, sustainable, and repeatable solutions and processes to reduce operational burden for the Technical Operations organization.
- Collaborated with Network Engineering & Deployment teams to ensure operational readiness for new infrastructure deployments.
- Drove standards adherence across the network, ensuring compliance with established policies and operational guidelines.
- Designed and implemented new detection mechanisms and alerts, improving platform issue identification and reducing mean time to detect (MTTD).
- Troubleshot network device configuration and low-level application interaction issues, resolving interconnectivity problems for enterprise customers.

SKILLS

Networking – IP networking fundamentals, BGP, OSPF, network analysis, troubleshooting, network device configuration, interconnectivity.

Operating Systems – Linux, Unix.

Cloud Infrastructure – AWS, EC2, S3, Lambda, CloudWatch.

Programming & Scripting – Python, Java, Shell scripting.

Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Scrum, ITIL, COBIT, Event Management Process.

PROJECTS

AWS Network Operations Dashboard Enhancement

- Developed Python scripts to automate the ingestion and aggregation of network performance metrics from various AWS services, feeding into an internal operations dashboard.
- Implemented new alerting rules within CloudWatch based on observed network traffic patterns, reducing incident response time by approximately 15% for critical connectivity issues.
- Contributed to the creation of detailed runbooks and documentation for common network troubleshooting scenarios, facilitating knowledge transfer within the operations team.

Automated Linux System Health Monitoring

- Created shell scripts to monitor key Linux system parameters (CPU, memory, disk I/O) on a fleet of **50+ servers**, automating log analysis for anomalies.
- Integrated script outputs with a central logging system (Splunk) to provide a unified view of system health and facilitate faster root cause analysis of performance degradations.
- Designed a reporting mechanism that generated weekly summaries of system performance trends, highlighting potential capacity issues before they impacted service.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
