# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Designed and developed **highly scalable** and **reliable services** for network configuration lifecycle management, handling over **5,000 network entity reservations** daily.
- Built **Java Spring Boot REST APIs** to integrate network capacity planning data with automation systems, processing approximately **15,000 requests per hour**.
- Engineered **Python automation scripts** to streamline data ingestion and ETL processes for network telemetry, reducing manual processing time by **40%**.
- Developed **Hibernate** ORM mappings and optimized **SQL queries** across PostgreSQL and Oracle databases for a financial services operations dashboard, improving data retrieval efficiency by **18%**.
- Implemented **CI/CD pipelines** using Jenkins and Git for automated build, testing, and deployment of network services, reducing deployment cycle time by **30%**.
- Containerized network management services using **Docker** and deployed them to an **AWS EKS** cluster, improving service resilience and scalability.
- Collaborated with **peer and partner engineering teams** to define technical roadmaps and incorporate new algorithms for network service evolution, contributing to the design of **three major service enhancements**.

## SKILLS

**Programming Languages** – Java, Python, SQL, C++

**Frameworks & Libraries** – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy

**Cloud Platforms** – AWS (EC2, S3, Lambda, CloudWatch, EKS)

**Databases** – PostgreSQL, MySQL, Oracle

**Tools & Technologies** – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux, Shell Scripting

**Concepts** – Service-Oriented Architectures (SOA), Distributed Systems, Network Capacity Management, Software Defined Networking (SDN), Agile Methodologies

## PROJECTS

**Network Entity Reservation Service (HCL Technologies)**

- Developed a **closed-loop system** in **Java Spring Boot** for automated reservation of network entities, managing up to **4,000 daily procurement requests**.
- Designed and implemented **RESTful APIs** for seamless integration with network automation platforms, ensuring **99.5% availability** during peak hours.
- Containerized the service using **Docker** and orchestrated deployments on **AWS EKS**, enabling scalable and fault-tolerant operation.

**Automated Network Telemetry Pipeline (HCL Technologies)**

- Engineered a **Python ETL pipeline** to process and aggregate network telemetry data from distributed sources, handling approximately **3,500 events per second**.
- Integrated the pipeline with **PostgreSQL** for data storage and retrieval, enabling efficient querying for capacity planning analysis.
- Created **scheduled reporting** using Python scripts to provide operational insights on network utilization trends to stakeholders.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
