# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Designed and developed **distributed systems** for automating the deployment and scaling of Amazon networks across global datacenters, handling **thousands of network devices**.
- Automated the collection and rationalization of data from **multiple network sources**, reducing manual workload for operations teams by an estimated **30%**.
- Collaborated with **Network Engineering teams** to ensure fast, smooth software roll-outs for new network infrastructure, participating in **daily stand-ups** and **sprint planning**.
- Identified and troubleshot recurring platform issues within the **AWS network fabric**, escalating effectively to senior engineering teams for resolution.
- Developed and maintained **production-quality distributed systems** at startup pace, focusing on reliability and iterative impact.
- Mentored junior engineers on **software development best practices** and provided technical guidance on complex problem-solving within the networking domain.
- Containerized network automation services using **Docker** and deployed them to **AWS ECS**, configuring basic resource limits for predictable performance.

## SKILLS

**Networking** – AWS Networking, Data Center Network, CLOS Fabric, IP Allocation

**Programming Languages** – Java, Python, SQL

**Cloud Platforms** – AWS (EC2, S3, Lambda, CloudWatch, ECS)

**Development Tools** – Docker, Git, Jenkins

**System Design** – Distributed Systems, Reliability, Scalability, Design Patterns

**Methodologies** – Agile, Scrum, Software Lifecycle, Code Reviews, Operations

## PROJECTS

### AWS Network Automation Service

- Developed a **Java Spring Boot service** to automate the provisioning and configuration of network devices in AWS datacenters.
- Implemented **REST APIs** for integration with existing network management tools, enabling automated configuration updates for over **5,000 network nodes**.
- Containerized the service using **Docker** and deployed it onto **AWS ECS**, establishing CI/CD pipelines with **Jenkins** for continuous deployment.

### Network Data Rationalization Platform

- Engineered a **Python data pipeline** to ingest and normalize telemetry data from various network monitoring tools (e.g., **Splunk**, custom agents).
- Built SQL queries against **PostgreSQL** to extract and analyze network performance metrics, identifying patterns that led to a **15% reduction** in network incident response time.
- Created automated reports using **Python scripting** to summarize key performance indicators for network operations stakeholders.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
