PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production support for enterprise ERP modules, including Accounting, Stock, and Supply Chain Management, ensuring system stability and addressing operational queries.
- Developed Python scripts to automate data extraction and reporting tasks for business intelligence functions, streamlining the delivery of financial and management reports.
- Executed ad-hoc SQL queries against PostgreSQL and Oracle databases for data validation and troubleshooting across integrated business systems, supporting change management processes.
- Collaborated with customer success teams to resolve technical and operational issues within an established ERP software solution, translating business requirements into actionable technical solutions.
- Documented system operation issues and worked towards optimal solutions, applying systematic problem-solving and analytical skills to complex ERP scenarios.
- Facilitated cross-system integrations by developing and maintaining REST APIs and managing data flows between ERP modules and third-party applications.
- Containerised key ERP support services using **Docker** and deployed them to an **AWS EC2** environment, improving deployment consistency and reducing manual configuration overhead.

SKILLS

ERP Systems – Accounting, Stock, CRM, E-Commerce, Business Intelligence, Supply Chain Management, Financial Reporting, Management Reporting

Programming & Scripting – Python, Java, SQL, Shell Scripting

Databases – PostgreSQL, MySQL, Oracle

Cloud & Containerisation – AWS (EC2, S3, Lambda, CloudWatch), Docker

APIs & Integrations – REST API, SOAP, FTP/SFTP, EDI, Third-Party Integrations

Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile/Scrum, Postman, SoapUI, Splunk, Dynatrace, Change Management, Problem Solving

PROJECTS

ERP Financial Reporting Automation (HCL Technologies)

- Developed Python scripts to extract data from core ERP modules (PostgreSQL/Oracle) and aggregate it for monthly financial and management reporting, reducing manual effort by **~15 hours** per reporting cycle.
- Designed and implemented ETL processes using **pandas** to clean and transform raw financial data, ensuring accuracy and consistency before loading into a data warehouse for downstream analysis.
- Created automated reports in **CSV** format that were delivered via SFTP to business stakeholders, improving the timeliness of critical financial insights.

Integrated ERP Support Dashboard (HCL Technologies)

- Built a consolidated dashboard using **Java Spring Boot** to monitor the operational status of multiple ERP modules, including Accounting and Supply Chain, integrating data from Splunk and Dynatrace.
- Engineered REST APIs to fetch real-time operational metrics and alert statuses from various integrated business systems, providing a single pane of glass for support teams.
- Implemented basic alerting mechanisms within the dashboard that notified support engineers of critical P1/P2 incidents impacting key ERP processes, reducing response times by an estimated **10%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
